ABSTRACT

Results of the 1982-1983 census of foreign students in the United States are presented. In addition to an overview of foreign study in the United States and other countries, data are provided on students' nationality, academic characteristics, personal characteristics, distribution by state, distribution in two- and four-year institutions, and in public and private institutions, institutions with the most foreign students, expenditures for living costs, intensive English language programs, and study abroad programs. Appendices provide information on: foreign student enrollments by institution and state for 1981-1982 and 1982-1983; foreign students detailed nationality data by region (i.e., extrapolated count, base numbers, percentage distribution, and percentage change); detailed field of study categories; codes for countries by continent and subregion; states within U.S. regions; foreign student enrollments in intensive English language programs by program and location; the number of U.S. college-sponsored study abroad programs, 1981-1982, by region/country as well as by number of students by sex and field of study; the number of foreign students in the 45 leading host countries, 1978; and characteristics of countries of origin. Information on data collection procedures and sources of data is included, along with a questionnaire. (SW)

North America	31	142	358.1
Oceania	52	77	48.1
Worldwide Programs	5,365	5,268	(1.8)

MAJOR TRENDS

Chapter 1: Overview. The foreign-student population continued to grow—but at a lower rate than in previous years (3.3%). The lower rate was largely a result of sharp decline in Iranian students. Excluding Iranian students, the overall foreign-student population rose 6.8%.

Unesco data on nearly 850,000 foreign students worldwide have been extracted to provide some perspective on the foreign-student population in the United States. The data reveal that 31% of all foreign students reported by Unesco in 1978 were in the United States, more than twice the share in the next largest country, France. Despite large numbers, foreign students were only 2.3% of the U.S. student population, a much lower proportion than in France (10.6%), the United Kingdom (7.8%), and most other major countries.

Chapter 2: Nationality. The most significant trend is the precipitous drop in the number of Libyan students (-26.9%) and the continuing drop in the number of Iranian students (-25.4%). However, there were also dramatic increases of 49.4%, 43.2% and 40.8% respectively in the number of Malaysian, Chinese, and Korean students and increases of more than 15% in the number of students from Indonesia and Pakistan.

Several data fields have been updated in this chapter: an income classification system (from the World Bank), country population data, foreign students per million population, adult literacy rate, growth rate of per capita GNP, and per capita educational expenditures. Among the major trends noted is a decline in the proportion of students from Low- and High-Income countries over the past 29 years while the proportions from Middle-Income countries remained constant and OPEC countries more than tripled their share. The foreign students per million population is low for Europe, Asia, and Africa among regional groupings and for Low-Income countries. It is highest for the Middle East and North America among regions and for OPEC among income groups.

Chapter 3: Academic Characteristics. The number of engineering students reported this year increased 3.7%. Engineers constituted 23.1% of all foreign students, the same as last year, a figure very close to its typical proportion over most years of the Census. The most significant increase (13.5%) was in the number of foreign students majoring in mathematics/computer sciences. The proportions of foreign students in each academic level remained close to those in recent years with 46.9% bachelors, 32.7% graduates, 13.3% associates, and 7.1% in other categories.

Chapter 4: Personal Characteristics. The 1982/83 data showed no significant change in the personal characteristics of foreign students. Foreign students were typically male (70.9%), not married (80.1%), primarily on personal and family funding (67.8%), and holding F visas (84.0%).

Chapter 5: Distribution by State. The number of foreign students enrolled in California declined for the second time since 1971/72 although that state still had over 20,000 more students than the next largest state, New York.

Chapter 6: Two- and Four-Year Institutions. The proportion of foreign students enrolled in two-year institutions rose steadily to a peak in 1980/81 of 17.4%, but declined to 14.2% this year.

Chapter 7: Public and Private Institutions. The proportion of foreign students enrolled in public institutions remained the same as last year (65.0%)—although the proportion in private institutions (35.0%) remained substantially higher than the figure for all U.S. students in private institutions (22.0%).

Chapter 8: Institutions with the Most Foreign Students. The number of institutions with 1,000 or more foreign students decreased from 74 to 70—the institutions with the largest foreign-student enrollment were Miami-Dade Community College, the University of Southern California, and the University of Texas at Austin. Twenty institutions reported 100 or more nationalities represented on their campuses—with American University and Boston University leading with 116 countries each.

Chapter 9: Expenditures for Living Costs. Increases in both the cost per student and the number of students resulted in estimated total expenditures for living costs of slightly over $1.8 billion (a 12.5% increase over 1981/82).

Chapter 10: Intensive English Language Programs. The number of students reported in this separate survey declined from 32,224 to 30,135 (-6.5%) although the number of programs reported increased from 305 to 314 (3.0%).

Chapter 11: U.S. Study-Abroad Programs. More than 30,000 students were reported in IIE's survey of U.S. college-sponsored study-abroad programs in 1981/82. Data on these programs are accompanied by data from Unesco on U.S. citizens enrolled in overseas institutions in 1978. Both databases show that the bulk of U.S. students abroad study in Europe.

Guidelines for the Release of Census Data

Reports based on census data are available to individuals, agencies, or corporations for clearly identified purposes of scholarly research, public information, or recruitment.

Reports will be produced for recruitment purposes only when the employer has indicated that the openings are for employment in the students' home countries or, in some instances, home regions; students' obligations to the sponsors of their U.S. study and/or to their own governments will be respected; the corporation or agency does not engage in discriminatory practices.

Student names obtained as a by-product of the census will not be released in any case without the student's prior consent.

The Institute of International Education reserves the right to request that the proposed use of the data be documented and to withhold data when the request is not deemed to be for appropriate scholarly, public information, or recruitment purposes.

The Institute of International Education (IIE) was founded over half a century ago to promote peace and understanding through educational and cultural exchanges. At present it is the largest not-for-profit organization in this field.

Among the services made possible through contributions are free information and counseling, student hospitality programs, a research and reference library, conferences/seminars, an overseas application information service, and publications relating to the field of international education. Contributions to the Institute are tax-deductible.

The Institute fulfills its mission through its services to sponsors—foundations, corporations, governmental agencies, and international organizations—and through its services to educational institutions and the general public. Services to its sponsors are self-supporting; services to educational institutions and the general public are made possible through contributions from individuals, foundations, and corporations.

Four IIE publications were used in the production of some sections of Open Doors: 1982/83. These publications can be purchased from the Communications Division, IIE. They are the following:

Costs at U.S. Educational Institutions: 1983/84, 192 pp., 1983, $22.95 (Annual).

English Language and Orientation Programs in the United States, 174 pp., 1982, $8.95.

Profiles: The Foreign Student in the United States, 188 pp., 1984, $22.95.

U.S. College-Sponsored Programs Abroad: Academic Year, 216 pp., 1983, $9.95 (Annual).

The Statistical Research Division (SRD) of the Institute conducted the Annual Survey of Foreign Students with the guidance of the Interassociational Committee on Data Collection (ICDC). The SRD can produce special reports from the data base for scholars and others interested in international educational exchange. For further information and charges contact the Statistical Research Division, IIE.

ACKNOWLEDGEMENTS

To the thousands of men and women of the National Association for Foreign Student Affairs (NAFSA), and the American Association of Collegiate Registrars and Admissions Officers (AACRAO), whose cooperation in the collection of these statistics is voluntarily given, whose professionalism and interest is always evident, and whose criticism has been constructive and, even more important, useful;

to the Bureau of Educational and Cultural Affairs of the United States Information Agency and, in particular, Joseph B. Bruns, Chief, Student Support Services, for support for the collection and analysis of the data;

to Leo Goldstone of the U.N. Statistical Office and former Chief of the Division of Statistics on Education, Office of Statistics of Unesco, who has served as a consultant to the Census;

to John F. Reichard, Executive Vice-President of NAFSA, and his staff at Washington, for tireless efforts on behalf of the ICDC;

to James I. Bauer for assistance in the preparation of tables and text for this book;

to our colleagues at IIE and in IIE's regional offices who have assisted both in the data collection effort and in the production of this book;

to Kenneth Bogard and Leo J. Sweeney, past and present presidents of AACRAO; Wallace B. Edgerton and Richard M.Krasno, past and present presidents of IIE; and Barbara B. Burn and Robert B. Kaplan, past and present presidents of NAFSA, for their support and encouragement;

to these and the many other people who assisted in the preparation of this book we express our gratitude.

INTRODUCTION

This edition of *Open Doors* contains the results of the 29th annual census of foreign students in the United States published in this series and conducted by the Institute of International Education (IIE). Since its founding in 1919, IIE has conducted numerous surveys describing international educational exchange. For 30 years, foreign student surveys were carried out in cooperation with the Committee on Friendly Relations Among Foreign Students.

In 1949, with the publication *Education For One World*, IIE began annual publication of statistics on foreign students in higher education. The series *Open Doors* was first published in 1955.

In 1974, concern over the data on foreign students in the United States led to discussions among representatives of IIE, the National Association for Foreign Student Affairs (NAFSA), the American Association of Collegiate Registrars and Admissions Officers (AACRAO), and the Bureau of Educational and Cultural Affairs of the U.S. State Department. These discussions resulted in the formation of the Joint Task Force on Data Collection with representatives from IIE, NAFSA, and AACRAO. The Task Force was renamed the Interassociational Committee on Data Collection (ICDC) in 1981.

As a result of deliberations of the Joint Task Force, a new reporting system was developed in which the institutional totals were requested instead of information on each individual student. This resulted in a substantial reduction in the amount of voluntary effort by reporting officials and a corresponding improvement in the response rate. While 61.8% of institutions polled in 1974/75 responded, 98.1% responded in 1982/83. Details of the response rate are provided in Appendix 6.

The new reporting methodology also produced a large enough aggregate base to permit extrapolations of data encompassing figures from institutions that provided partial reports. These calculations are detailed in Appendix 2.

One limitation of the new methodology was the loss of data on the individual student correlating his nationality, field of study, and other student characteristics. Based on the results of a survey conducted in the spring of 1979, it was concluded that the increased use of computers would make it possible for a sufficiently large sample of institutions to provide selected individual data on their foreign student population. IIE initiated a biennial survey in the academic year 1979/80 to request individual data on foreign students. These data, which allow the correlation of country, field of study, academic level, and sex for foreign students, are published in the companion publication *Profiles: The Foreign Student in the United States*. The second edition of *Profiles*, based on the 1981/82 academic year, has recently been published.

In conducting these surveys, the voluntary cooperation of college registrars, admissions officers, and foreign student advisers has been a major component in successful implementation.

DEFINITIONS

Foreign Student

A foreign student has been defined as anyone who is enrolled in courses in the United States who is not a citizen or an immigrant (permanent resident). Refugees are included.

F Visa

An F visa is a student visa which may be granted to bona fide students who satisfy requirements for pursuing a full program of study at a U.S. academic institution which admits foreign students, who enter the United States for a temporary stay and solely to study, and who have permanent residence in foreign countries which they have no intention of abandoning.

J Visa

A J visa is an exchange-visitor visa which is used to bring to the United States for a variety of educational purposes students, trainees, teachers, professors, research scholars, international visitors, or professional trainees who are sponsored by an agency or organization which has been approved for sponsorship by the Secretary of State for Exchange Visitors.

Higher Education

In respect to the United States, "Higher Education" is used to describe the group of colleges and universities listed in the *Education Directory, Colleges and Universities—1981/82*. Printed by the U.S. Government Printing Office, it is National Center for Education Statistics document 82-306.

Fields of Study

The fields of study used in this document are those from *A Classification of Instructional Programs*, also published by the NCES. See Appendix 3 for the list of fields.

Regions

The countries and territories included under each major region are listed in Appendix 4.

Part I: THE ANNUAL CENSUS OF FOREIGN STUDENTS IN THE UNITED STATES

1. OVERVIEW OF FOREIGN STUDY

This chapter provides an overview of foreign study both in the United States and throughout the world. The first section provides a summary of data from the Annual Census of Foreign Students in the United States, conducted by IIE since the academic year 1954/55. The second section summarizes data collected by Unesco and published in Unesco's *Statistical Yearbook* (1981).

The Annual Census of Foreign Students in the United States

The foreign-student population grew by 3.3% in 1982/83, continuing a pattern of growth that has been observed in *Open Doors* throughout most of the 29 years since the first Census. The number of foreign students reported was 336,985, an increase of 10,686 students over the number reported in 1981/82.

It should be noted here that variations will appear in student totals in various tables in this book. For instance, **Table 1.0** lists the total number of foreign students reported as 336,985, the actual number. In **Table 1.2** and in other tables throughout this book, that figure has been rounded off to 336,990. In **Table 2.3** and in other tables, the "World Total" of students appears as 335,881, a figure that excludes certain uncategorized countries and students who were reported as stateless or whose origin was unknown.

The data presented in *Open Doors* are the result of a survey of 2,849 institutions; 2,795 or 98.1% responded (266 of which reported having no foreign students). This was the highest response rate in the 29-year history of the Annual Census of Foreign Students. A summary of survey response data appears in **Appendix 6**.

The number of foreign students reported each year since 1954/55 are presented in **Table 1.0** and **Figure 1A**.

TABLE 1.0

Foreign Students Reported and Institutions Reporting Foreign Students, 1954/55–1982/83

Year	Foreign Students	Institutions Reporting Foreign Students
1954/55	34,232	1,629
1955/56	36,494	1,630
1956/57	40,666	1,734

as well as the number of institutions reporting these students. In 1982/83 the 2,529 institutions reporting a foreign-student enrollment represented an increase of 3.1% over 1981/82.

Table 1.1 shows the annual rates of increase for both the number of students and the number of institutions reporting foreign students for selected years. Highlighted are some of the large increases in the number of foreign students reported in the late 1970s, as well as fluctuations in the number of institutions reporting foreign students. In 1981/82 there was a decrease in the number of institutions surveyed, resulting in a 10.2% decrease in the number of institutions reporting foreign students. This reduction resulted from the elimination from the Census of all institutions that are not listed in the *Education Directory, Colleges and Universities* with (1) accreditation, (2) provisional or probationary accreditation, or (3) preaccredited status by a Regional Accrediting Commission. Despite the drop in the number of institutions surveyed, the number of foreign students reported by accredited institutions increased 6.0%.

Table 1.2 shows the number of foreign students reported from Iran, and from all other countries, with annual percentage changes, since 1969/70. Evident are the dramatic increases in the number of Iranians studying in the United States—particularly between 1974 and 1978—and the equally dramatic decline in their number since 1980. **Table 1.2** suggests also a fairly constant rate of increase in the number of foreign students in general from 1975 to 1980. While the rate of increase has declined somewhat since 1980, if the striking Iranian decline is overlooked, the increase was still 6.8% in 1982/83.

While the number of foreign students continues to grow, it represents a very small fraction of all students in higher education in the United States. As **Table 1.3** shows, for most of the past 29 years foreign students accounted for an average of 1.5% of all such students as reported by the National Center for Education Statistics. However, this figure increased to 2.7% in 1982/83, a result of relatively stable U.S. enrollments at a time when foreign-student enrollment continued to grow.

§ This figure is for 1978.

Unesco Data on Foreign Study*

According to Unesco's *Statistical Yearbook*, 1981, 842,705 foreign students were reported in 1978 by 45 responding countries. The 20 countries with the largest foreign enrollments educated 771,766 foreign students in 1978, nearly 40% more than in 1975 and almost double the number reported in 1970, as shown in **Table 1.4**.

Unesco cautions that these data are "indicative" only but include "approximately 90% of the known total." Two countries with large numbers of foreign students are not included: Brazil, with 11,730 students for whom data were not available, and Lebanon, which last reported in 1970 (22,184 students). The Unesco sample of 45 countries includes only two countries from Latin America, Cuba and Guatemala, and two countries from sub-Saharan Africa, Senegal and the Ivory Coast. Therefore, these data may understate a significant flow of foreign students within world regions.

The United States was host to almost one-third of all foreign students reported in 1978 (263,940), more than twice the number in the second-largest host country, France (108,286). The Soviet Union, United Kingdom, and Federal Republic of Germany each reported approximately 60,000 students. These five countries hosted almost two-thirds of all foreign students.

The 20 largest host countries, listed in **Table 1.4**, reported 91.6% of all foreign students. Of these, the U.S. proportion was 34.2%—slightly lower than its 36.7% share in 1970. France's share rose from 8.7% to 14.0% between 1970 and 1978, based on a 213.9% increase in the number of foreign students reported. Enrollments increased 142.3% in the United Kingdom over the same period, while in the U.S.S.R. and the Federal Republic of Germany enrollments increased by 125.5% and 99.2%, respectively. Total enrollments in the 20 countries in this group increased 95.6% from 1970 to 1978.

The impact of the presence of foreign students on educational institutions of a host country is related in part to the proportion they form of the entire student population. As **Table 1.5** and **Figure 1B** detail, these

* Data in this section are taken from Unesco's 1981 *Statistical Yearbook* (Paris: Unesco, 1981), III, 461-491. **Tables 3.15 and 3.16**.

proportions varied significantly among the leading host countries. Three countries reported foreign-student enrollments of more than 10% in their colleges and universities: France (10.6%), Switzerland (16.9%), and Saudi Arabia (18.8%). Two countries reported foreign enrollments of less than one percent: Japan (0.6%) and India (0.2%). Of the host countries with the largest enrollments, the United States (2.3%) and the Soviet Union (1.0%) reported small proportions of foreign students, while the United Kingdom (7.8%) and the Federal Republic of Germany (5.0%) reported relatively larger proportions of foreign students.

The number of foreign students from each world region in each of the 20 leading host countries is detailed in **Table 1.6**, with distribution percentages for the five largest host countries in **Table 1.7**. These tables reveal a high proportion (34.9%) of Africans studying in France and even higher proportions of Asians (39.6%), South Americans (46.7%), and Oceanians (51.9%) studying in the United States.

A number of host countries reported more than 50% of their foreign students as coming from their own world region (**Table 1.6**). Among these were Italy, Japan, Sweden, Switzerland, the Philippines, Austria, India, and Egypt (where the bulk of Asian students were from the Middle East). By contrast, the five leading host countries (as well as Canada and Spain) were hosts to a more diverse foreign-student population.

Table 1.7 shows the distribution of foreign students among the five leading host countries and among groups of the next-largest reporting countries. Three

* *Excluding the U.S.S.R., which, with 62,942 foreign students, was the third-largest host country. The U.S.S.R. did not report data on any country of origin in this table except for Vietnam (3,989).*

† *Source: Unesco, Statistical Yearbook, 1981.*

[1] *These figures are for 1977.*

quarters of all African and South American students reported in the Unesco survey were studying in the five host countries with the largest enrollments. **Figure 1C** illustrates this distribution.

The percentage distribution of foreign students within leading host countries by region of origin is shown in **Table 1.8** and **Figure 1D**. This further indicates the differences in the composition of foreign student populations in individual host countries from the totals reported for all countries. Africans comprised 51.5% of all foreign students in France, but only 7.6% in the Federal Republic of Germany and 18.9% of all foreign students. Asians, 44.1% of all foreign students, totaled 55.8% of foreign students in the United States but only 18.7% of those in France.

Some insight into the reasons behind these patterns is provided by the country-of-origin data in **Table 1.9** and **Table 1.10**. **Table 1.9** and **Figure 1E** show the number of students reported in the 19 leading host countries (excluding the Soviet Union, which provided data only for Vietnam) from the 20 leading countries of origin. Several countries sent more than two-thirds of their overseas students to a single host country in 1978. Iran, Nigeria, China (includes both Taiwan and the People's Republic of China), Canada, Japan, India, and Venezuela sent the bulk of their students to the United States, while Morocco and Algeria sent the bulk of their students to France. Eight countries sent more than 80% of their students to the four leading host countries, as shown in **Table 1.10**.

2. NATIONALITY

The 336,985 foreign students reported in the Annual Census for 1982/83 came from 188 countries and territories. These latest figures in the 29-year pattern of continuous growth already described in Chapter 1 have been characterized by numerous fluctuations in both the numbers and proportions of students from different regions, country groupings, and specific countries. This chapter focuses on the major trends and relationships that have been reported since 1954/55, and includes tables that group countries according to income level, foreign students per million population, and adult literacy rate. **Appendix 11** presents the data base used in the tables in this chapter. **Appendix 12** defines the categories and sources used to obtain them.

Distribution by World Region

Although there has been a steady increase in the total number of foreign students over the 29 years reported, the pattern of increase has varied from region to region, as illustrated in **Table 2.0** and **Figures 2A** and **2B**. **Table 2.1** provides a breakdown of the foreign-student population within subregions, with percentage of all foreign students reported; **Appendix 2** provides a comparison of 1981/82 and 1982/83 figures.

Continuing a pattern that has been broken only once (in 1979/80) since the academic year 1954/55, the largest group of foreign students in 1982/83 came from South and East Asia. This region sent 119,650 students to the United States, or 35.5% of all foreign students reported in the Annual Census. This is an increase of 13,490 students or 12.7% over 1981/82, nearly quadruple the percentage increase for all foreign students. As shown in **Table 2.1**, half (50.7%) of the students from this region came from East Asia, representing an 8.3% enrollment increase from 1981/82. The largest proportional increase (17.9%) of students from this region came from Southeast Asia.

While South and East Asians represented more than one-third of foreign students in the United States, that proportion is small in comparison to that region's 57.7% share of the world population (**Table 2.2** and **Figure 2C**). If densely-populated China and India are excluded, however, Asia's foreign-student proportion falls only slightly to 29.8%, while its regional share of the world population drops to 18.4%, thus showing a higher share of the foreign-student population than inclusive figures suggest. Similarly, the region's foreign student/population figure (foreign students per million population) was one of the lowest, 49, based upon the large populations of China and India; excluding those two countries, the number becomes 130, very close to the comparable world figure of 124.

As in other years since 1975/76, the second-largest group of foreign students in 1982/83 came from the Middle East. Numbers of students from this region began to increase rapidly in 1974/75, averaging a 26% increase annually from 1974/75 to 1979/80. In 1979/80 it was the largest source (29.2%) of foreign students. In 1981/82 the numbers of Middle Eastern students declined by 12.2% to 74,390, the first decrease since 1971/72. This decline continued in 1982/83, when the region sent 7,110 fewer students or 9.6% less than in 1981/82. Both the surge and the decline were led by Iran, the region's largest source of foreign students in the United States. If Iranian numbers (which decreased by 25.4% in 1982/83) are excluded, the remainder of the region showed a gain of 1,990 students or 5.2% (see **Appendix 2**). Nevertheless, as **Table 2.2** and **Figure 2C** show, the region sent 487 students per million population, nearly four times the world average (excluding China and India). Similarly, the region's 19.9% share of the foreign-student population in 1982/83 was dramatically greater than its 3.3% share of the world population.

The third-largest group of foreign students came from

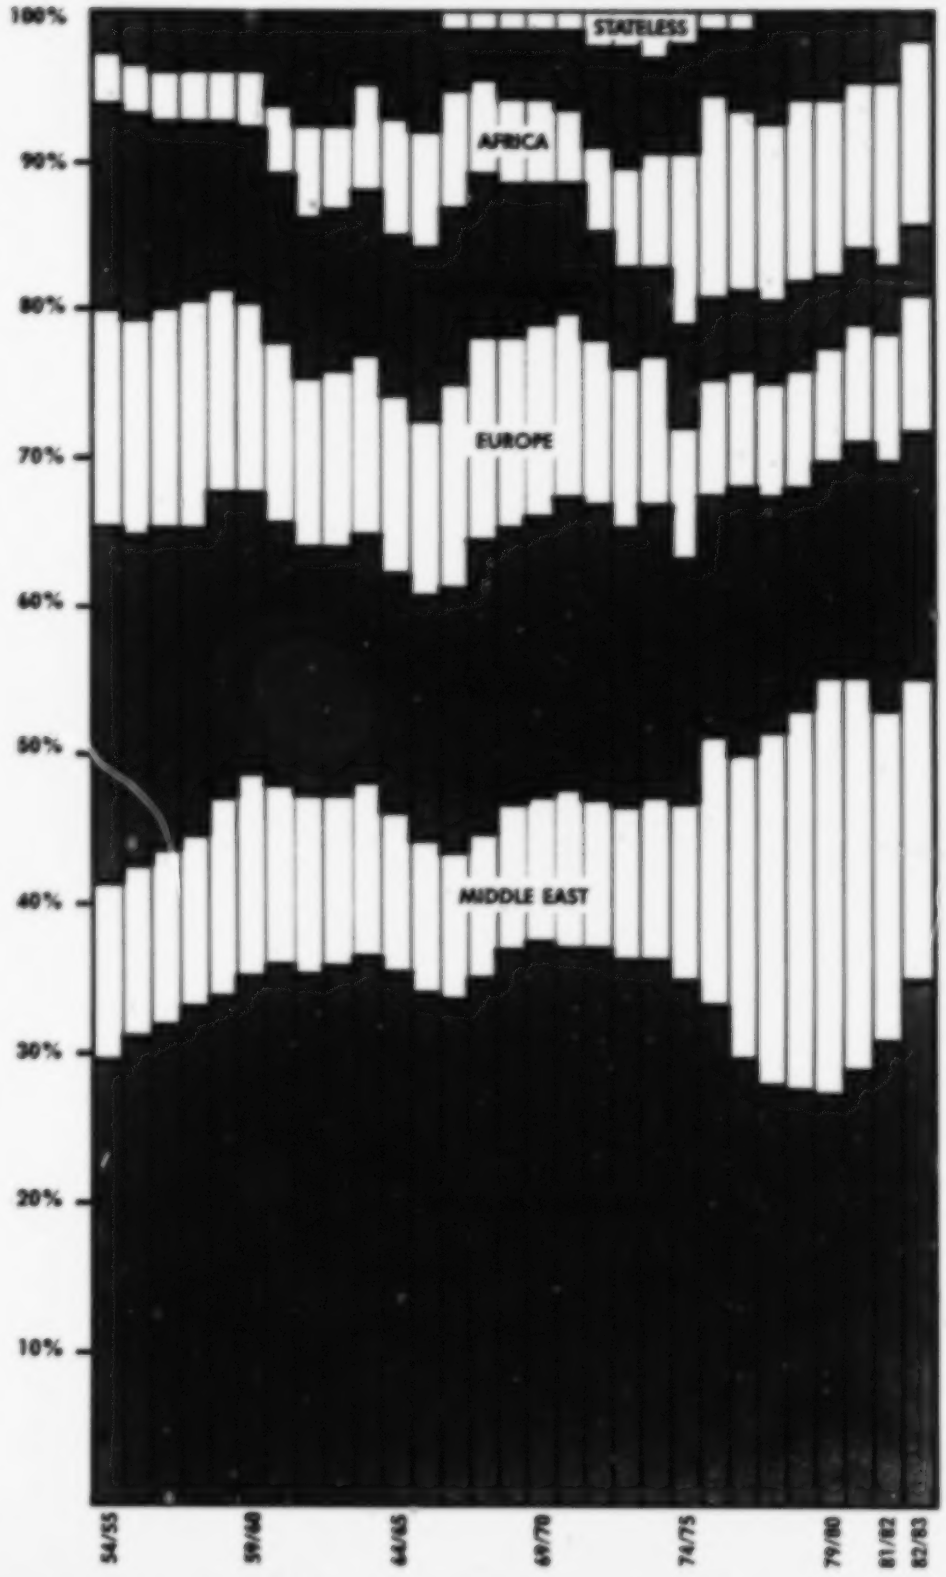
FIGURE 28

Percentage Distribution of Foreign Students by Continent of Origin, 1954/55–1982/83



Latin America, accounting for 16.9% of the foreign-student population. Over half of Latin American students (55.8%) come from countries in South America (**Table 2.1**). The regional rate of increase in 1982/83 was only 2.6%, compared to an 11.1% increase in 1981/82 and a 17.8% increase in 1980/81. Despite the slower growth rate, the region represented a much higher percentage of the foreign-student population (16.9%) than suggested in **Table 2.2** by its share of the world population (8.4%). Correspondingly, the region's foreign student/population figure (159) was higher than the world total excluding China and India (124).

Students from Africa represented 12.7% of all foreign students in 1982/83, very close to Africa's 11.7% share of the world population. However, its foreign student/population figure was only 87, lower than all regions except Europe, and Asia including China and India. Africans comprised only 3.6% of the foreign-student population in 1954/55, but their numbers grew steadily throughout the 1950s and 1960s and have remained fairly constant since the mid-1970s. As **Table 2.1** indicates, the majority of Africans come from West Africa.

In 1982/83, 31,570 of the foreign students reported in the United States came from Europe, primarily from countries in Western Europe. The proportion of foreign students coming from Europe declined steadily during the first 21 years of the Census, then from 1975/76 to 1980/81 remained fairly constant at about 8%, growing only slightly in the last two years to 9.4% of all foreign students. In numbers, European students increased 8.9% from 1981/82 to 1982/83, a growth rate far exceeding the 3.3% increase in the total foreign-student population. Nevertheless, European students, especially Eastern Europeans, were underrepresented, with the lowest number of foreign students per million population (42).

The number of North Americans studying in the United States, most of whom are Canadians, decreased from 15,460 in 1981/82 to 14,570 in 1982/83, a drop of 5.8%. North America's regional share of 4.3% is the lowest proportion ever recorded for this region. The proportion of students from Oceania remained at 1.2% (**Table 2.2**) of all foreign students, a total of 4,040 students (**Table 2.1**). However, both regions sent proportionally more students to the United States than suggested by their shares of the world population, resulting in foreign student/population figures above the world average of 124 (607 for North America and 178 for Oceania).

In general, the five countries in each region with the largest foreign-student enrollment in the United States sent nearly as many or more students per million population than their respective regional averages (**Table 2.3**). The exceptions were India, with only 19 students per million inhabitants; Brazil, with 26; Italy, 30; and Egypt and Ethiopia, with 58 and 59, respectively.

Distribution Within World Regions

The overall distribution of foreign students among world regions masks shifts in the distribution within each region. **Table 2.4** highlights the changes in each of five world regions in the representation of foreign students from the five countries that sent the most students. **Appendix 2** lists the percentage change in the number of students for each country from 1981/82 to 1982/83.

Nigeria continued to lead in foreign-student proportions in Africa, a position it has held since 1964/65. It sent approximately nine times the number of students of second-ranking Egypt and represented nearly half of all African students. Equally notable is the decline in the proportion of students from Egypt: 28.4% of all African students in 1954/55, but only 5.4% in 1982/83. Changes in the distributional pattern in 1982/83 resulted in Ghana, with a 3.8% decrease in numbers, dropped from the list, to be replaced once again by Ethiopia (4.3% share). Due to an increase of 11.7% in the number of students, Egypt moved from fourth place in 1981/82 to second place in 1982/83. Libya and Kenya, although still among the five leading countries in Africa, experienced declines in student numbers, of 26.9% and 1.9%, respectively.

European countries were much more evenly represented in the United States than African nations, and their distributional pattern has not changed significantly in 20 years. For the last two decades the United Kingdom has sent the largest number of students, 18.6%

in 1982/83. Not far behind were Greece, the Federal Republic of Germany, and France with shares of 15.3%, 11.8% and 10.0%, respectively. Among countries sending more than 100 students (**Appendix 2**), the only Western European countries to experience a decline in the number of students were Belgium (-3.8%) and Austria (-6.3%). In Eastern Europe, the U.S.S.R. showed a 16.3% decline, but the two other Eastern European countries with more than 100 students in the United States increased enrollment from 1981/82.

With an 11.0% increase in the number of students from 1981/82 to 1982/83, Venezuela continues to be the leading country of origin in Latin America at 27.3%. Latin America's five leading countries represented 58.2% of the region's students. Among Latin American countries with more than 1,000 foreign students, three Caribbean countries showed large gains in the number of students: Trinidad and Tobago (15.4%), Bahamas (19.8%) and Haiti (21.3%). Cuba and Panama experienced sharp declines of 27.9% and 30.6%, respectively.

The 16 countries in the Middle East sent 67,280 students to the United States in 1982/83, a 9.6% drop from 1981/82. Iran continued to lead countries in the region, but the loss of 9,100 students brought its share down to 39.8%. Iran has experienced volatile changes in its foreign-student population in recent years. In 1974/75, 13,780 students came from Iran to study in the United States. The numbers increased rapidly until 1979/80, when there were 51,310 Iranians studying in the United States. The decline has been just as dramatic—in 1982/83 declining to 26,760, a 47.8% drop since the 1979/80 high of 51,310.

If Iran is excluded, the distribution of students among the remaining Middle East countries is similar to that in other regions. In recent years proportions of students from Saudi Arabia, Lebanon, Jordan, and Kuwait have risen steadily.

The 1982/83 academic year saw a continued increase in the number of students from South and East Asia, but a shift in the pattern of representation among countries in the region. Taiwan remained the leading country of origin, but its share dropped form 19.3% in 1981/82 to 17.4% in 1982/83. Malaysia, which made its initial appearance in the top-five ranking in 1981/82, moved from fourth to second place due to a 49.4% increase in its number of students. Korea sent 40.8% more students for a 9.5% regional share, making it one of the five largest countries of origin in South and East Asia for the first time in more than 15 years and displacing Hong Kong, which was ranked third on the list only two years ago. Several other countries in the region increased their student numbers significantly over 1981/82: China (with an increase of 43.2%), Bangladesh (an increase of 32.3%), Sri Lanka (25.0%), Indonesia (23.6%) and Singapore (33.7%).

Leading Countries of Origin

The 15 leading countries of origin of foreign students are listed in **Table 2.5**, at five-year intervals from 1954/55 to 1979/80 and for the last three years.

Eight of the 15 countries reported in 1954/55 reappeared in 1982/83, although there were considerable changes in their relative position. Many of the changes are attributable to the growth in the foreign-student population from OPEC countries and from countries in South and East Asia. These countries have moved up in rank and, in some instances, have replaced European and Latin American countries which predominated in earlier years.

Despite a significant drop in student numbers for the third year in a row, Iran still sent the most foreign students in 1982/83, 26,760 or 7.9% of all foreign students, followed closely by Taiwan and Nigeria, both of which sent more than 20,000 students. It was the first year since it took the lead in 1974/75 that Iran did not lead student numbers by a wide margin. Taiwan has been the second-largest source of students for most of the past 29 years. Nigeria remained in third place for the fourth year, followed by Venezuela (up from sixth place) and Malaysia (up from ninth place).

The number of students from Hong Kong continued to decline, from 8,990 in 1981/82, to 8,610 in 1982/83. As a result, Hong Kong, second on the list as recently as 1974/75, descended to 11th in 1982/83.

Percentage Changes Among the 25 Leading Countries of Origin

Table 2.6 lists the percentage change in student numbers from 1981/82 to 1982/83 for the 25 countries sending the most students. Malaysia, China, and the Republic of Korea appear at the top of the list with dramatic increases in their student numbers of 49.4%, 43.2% and 40.8%, respectively. Iran ends the list with its 25.4% reduction in student numbers.

Several other leading countries showed percentage increases of more than 10%: Indonesia (23.6%), Pakistan (16.3%), Greece (14.7%), India (14.6%), Venezuela (11.0%), Colombia (10.4%) and Jordan (10.4%). Canada, Mexico, and Saudi Arabia showed reductions in their numbers of more than 5%.

The 25 countries in **Table 2.6** accounted for 71.8% of all foreign students in 1982/83 and 57.8% of the net increase in numbers of foreign students. **Appendix 2** lists the total numbers from all countries reported and percentage changes from 1981/82 to 1982/83.

Table 2.7 lists, and **Figure 2D** illustrates, all countries and territories with more than 1,000 students reported in the United States in 1982/83. The 1,000-student mark, a major milestone for only eight countries in 1954/55, was shared by 65 countries—more than a third of all countries and territories reported. Those 65 countries accounted for 92.1% of all foreign students reported.

Size of Foreign Student Population by Country Grouping

Counts of students in the United States from each of the 188 countries and territories reported in the Census ranged from one student (from countries such as Albania, Nauru, and Tibet) to 26,760 students (from Iran). **Table 2.8** and **Figure 2E** indicate that while more than 10,000 students were reported from a total of only nine countries, they accounted for 44.4% of all foreign students. By contrast, the 67 countries sending fewer than

Percentage of All Foreign Students	**72.2**	**71.8**	**57.8**	

100 students represented 0.5% of the foreign-student population.

The data show that countries sending from 5,000 to 14,999 students increased in number over the three years from 1979/80 to 1982/83. In 1979/80, the nine countries in this grouping sent 25.7% of the total foreign-student population in the United States. In 1982/83, 14 countries sent 38.3% of all foreign students. The largest change occurred in student numbers from countries sending between 10,000 and 14,999 students (an increase of 437.9%), due to a jump in the number of countries in this category from one in 1979/80 to five in 1982/83. Next was a 48.3% increase in student numbers from countries sending from 1,000 to 2,499 students. In contrast were decreases in other groupings, with fewer student totals reported from countries sending more than 15,000 students, from countries sending 2,500 to 4,999 students, and from countries sending from one to 999 students.

Distribution by Income Group

From data supplied by the World Bank, 174 countries were separated for analysis into five categories: High Income, Middle Income, Low Income, OPEC, and Non-Market European, based on 1980 per capita Gross National Product (see **Appendix 12** for a further description).

Low-, Middle-, and High-Income Groups

Table 2.9 lists the total number and percentage of students from countries in each income category in five-year intervals since 1954/55. These numbers are illustrated in **Figures 2F** and **2G**. As **Figure 2G** shows, the proportion of students from high-income countries has declined significantly, from 31.7% in 1954/55 to 16.4% in 1982/83. The middle-income countries have consistently sent between 38% and 49% of all foreign students, while low-income countries have sent between 9% and 15%, with the exception of 1959/60, when they accounted for 20.7% of all foreign students.

OPEC

The doubling of foreign students from 1969/70 to 1979/80 was due in large part to the seven-fold increase in the number of students from the 13 members of the Organization of Petroleum Exporting Countries (OPEC). Of the 151,381 additional students, 58.2% were attributed to OPEC, 29.4% to middle-income nations, and 8.9% to high-income nations. During the last half of the 1970s, the proportion of students from OPEC nations rose from 19.2% to 35.1%. However, in 1982/83 the OPEC share was 26.3%, representing the second time that the number and proportion of students reported from OPEC countries declined (**Table 2.10**).

As seen in **Table 2.11**, three of the seven OPEC countries leading in enrollment showed a decrease in the number of students in 1982/83: Iran had 9,100 fewer students (-25.4%), Saudi Arabia 970 fewer (-9.5%), and Libya 780 fewer students (-26.9%). These losses were partially offset by increases in the number of students from Nigeria (1,150 or 5.9%), Venezuela (1,530 or 11.0%) and Indonesia (960 or 23.6%).

** Includes students of unknown or unspecified origin and from countries not categorized.*

FIGURE 2F

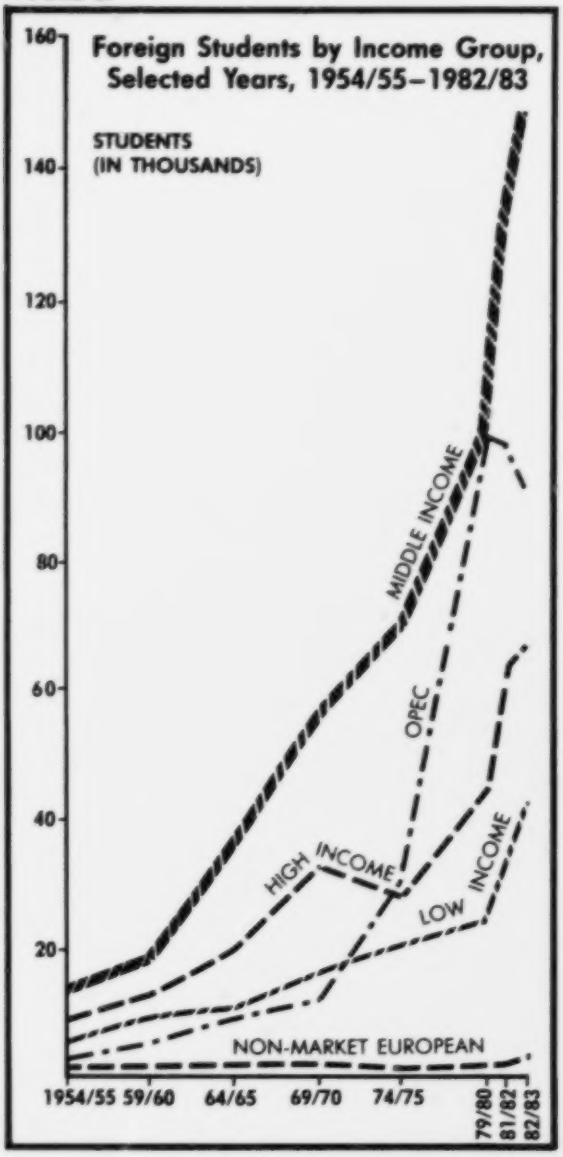

Table 2.12 shows that while the number of students from OPEC countries decreased by 7.0% in 1982/83, the number of students from all other countries increased by 7.5%. If the Iranian foreign-student segment is excluded, however, the 12 remaining OPEC countries show an average 4.1% increase (**Table 2.11**).

Foreign Students per Million Population

In 1982/83, there were large variations in the numbers of foreign students per million inhabitants among income groups, as seen in **Table 2.13**. Low-income and non-Market European nations were underrepresented, with foreign student/population figures of 19 and 5, respectively. The corresponding figure for high-income countries (113) was also lower than middle-income (189) and OPEC (261), suggesting perhaps that the availability of higher education within those countries is similar to that within the United States.

Figure 2H illustrates this percentage distribution of foreign students by income group and compares it with each group's percentage of the world population (**Table 2.13**), making plain the disproportionately high percentages of students from middle-income and OPEC countries and low percentages from low-income and non-Market European countries.

Table 2.14 compares foreign student/population figures for each income group with those of the five leading countries of origin within each group. In the high-income category, more than half of all students came from the two leading countries, Canada and Japan. Canada's foreign student/population figure was well above the group's average at 587. Students from middle-income countries represented a more heterogeneous mix: of the 89 countries represented, the five leading countries accounted for just over 40% of all students in this category. The majority of nations in this category have small populations (71 nations have fewer than 10 million citizens) and have high students-per-million ratios. Over half of the world's population lives in low-income nations (approximately 40% in China and India alone), resulting in very low numbers of students per million population; Gambia (350) had the highest figure of any low-income nation (**Appendix 11**).

TABLE 2.12

Students from OPEC and Non-OPEC Countries, with Annual Percentage Change 1978/79–1982/83

Country Groupings	1978/79	1979/80		1980/81		1981/82		1982/83	
	Students	Students	Percentage Change	Students	Percentage Change	Students	Percentage Change	Students	Percentage Change
OPEC	89,122	100,374	12.6	101,625	1.3	95,357	(6.2)	88,707	(7.0)
Non-OPEC	174,816	185,969	6.4	210,257	13.1	230,942	9.8	248,278	7.5
All Foreign Students	**263,938**	**286,343**	**8.5**	**311,882**	**8.9**	**326,299**	**4.6**	**336,985**	**3.3**

The OPEC nations provide a sharp contrast to other income groups. Of the five leading countries, three had foreign student/population figures of over 650 (Iran, Venezuela, and Saudi Arabia), leading to the highest average (261) of any income group. The five leading countries represented 87.1% of all students from the 13 OPEC nations.

Other Characteristics

The database for many of the tables included in this year's *Open Doors* is presented in **Appendix 11** and described in **Appendix 12**. In addition to information on the number of foreign students in 1982/83, 1980 population and income level, and foreign students per million population, data on the Growth Rate of Real per Capita GNP, 1970–1979; Educational Expenditures per Capita, 1978; and Adult Literacy Rate, 1977, are included for each country.

Two tables summarize these data for major groupings: **Table 2.15** examines foreign-student ratios for country groupings based on literacy rates and includes the 1981/82 academic level breakdown; **Table 2.16** provides the seven data elements for the 10 leading countries of origin. Neither table suggests any clear correlation between these elements and foreign-student numbers. They have been included because their value towards an understanding of foreign-student patterns merits further examination.

Field of Study

The most popular field of study among foreign students in 1982/83 was engineering, the choice of 23.1% of all students reported (**Figure 3A**). Next was business and management, chosen by 18.1% of foreign students. Grouped far behind the leading fields were physical and life sciences (8.0%), mathematics/computer sciences (7.6%), and social sciences (7.1%).

Table 3.0 lists data for the last three years in 46 field-of-study subcategories outlined in *A Classification of Instructional Programs**, published by the National Center for Education Statistics (NCES). (**Appendix 3** contains a summary of field-of-study categories, as well as the NCES detailed classification of programs.) There have been only slight changes in the choice of major field of study over the last three surveys. Most significant in 1982/83 was the 13.5% increase in the number of foreign students majoring in mathematics/computer sciences. This major category increased by 3,060 students, most of them in the subfield of computer and information sciences. The major fields of engineering, business and management, and physical and life sciences also showed increases in the numbers of foreign students, though only physical and life sciences showed a slight proportional increase. The greatest increase among subcategories was in liberal/general studies (in the major category "other"), which showed an influx of 4,120 students in 1982/83.

Four major fields showed declining numbers of students: social sciences (showing a decline of 1,290 students), humanities (a loss of 820), agriculture (-340), and education (-150).

* *This listing combines the six Personal and Social Development subcategories into one category.*

Table 3.1 and **Figure 3B** show field-of-study choices for major categories since 1954/55. Although short-term changes were relatively slight, **Figure 3B** indicates substantial long-term shifts in foreign students' choices of majors. Business and management and mathematics/computer sciences have consistently gained in enrollment percentages, while the proportions of foreign students studying physical and life sciences, social sciences, and health sciences have declined. The proportion of students studying the humanities fell from 14.9% in 1970 to 3.6% in 1982/83. Fine and applied arts, education, engineering, and agriculture have attracted a fairly consistent proportion of foreign students over the 29-year history of the census.

Percentage Distribution by Institutional Type and Institutional Control

Table 3.2 details, by major field of study, the kinds of institutions in which foreign students were enrolled in 1982/83 and provides comparable percentage distributions for all students.

While 85.8% of all foreign students reported were enrolled in four-year institutions in 1982/83, in four fields of study more than 95% of foreign students studied in four-year schools: 95.8% of foreign students in physical and life sciences were in four-year schools, as were 96.3% of education majors, 96.4% of social science students, and 96.6% of humanities students. In contrast, more than one-fifth (22.7%) of students reported in the "other" category were in two-year institutions.

The distribution of foreign students among public and private institutions differed substantially. While 65.0% of all foreign students were enrolled in public institutions in 1982/83, these schools claimed 93.4% of

foreign students in agriculture and 75.4% of those majoring in mathematics/computer sciences. Private institutions, with 35.0% of the total foreign-student body, reported enrolling approximately half (50.2%) of all students in humanities and nearly half (48.9%) of those in fine and applied arts.

Field-of-Study Choices in Two- and Four-Year Institutions

Because the vast majority of foreign students in the United States were enrolled in four-year institutions, field-of-study choices by students in four-year institutions were similar to those of the entire foreign-student body. Choices by students in two-year institutions, however, differed considerably, as **Table 3.3** and **Figure 3C** show. A far greater percentage of foreign students in two-year colleges chose business and management (22.4%) than did those in four-year schools (17.5%). The converse was true for physical and life sciences, chosen by 2.8% of foreign students in two-year institutions and 8.7% of those in four-year institutions. A smaller percentage of two-year students chose to study the social sciences, humanities, fine and applied arts, education, and agriculture than did their peers in four-year schools.

Field-of-Study Choices in Public and Private Institutions

Table 3.4 and **Figure 3D** profile foreign students by field of study in public and private institutions. One-

fourth of all foreign students in public institutions studied engineering, compared with 19.8% in private institutions. Public institutions also reported higher percentages of foreign students studying mathematics/computer sciences, physical and life sciences, and agriculture. Private institutions reported larger percentages of foreign students in business and management, humanities, social sciences, and fine and applied arts.

Academic Level

The academic levels of foreign students reported in the United States are summarized in **Tables 3.5** and **3.6** and in **Figure 3E**.

Table 3.5 details academic levels of foreign students for the last three academic years. The number of associate-degree candidates increased by a slight 3.0% in 1982/83 after a decline the previous year of 8.9%. Associate-degree programs accounted for 13.3% of the foreign-student body in 1982/83—exactly the same as in 1981/82.

In 1982/83, approximately 6,000 more foreign students enrolled in bachelor's-degree programs than in 1981/82, for a proportion of 46.9% of all foreign students. Approximately two-thirds of the increase in bachelor's students was reported at the junior and senior levels—suggesting that many were two-year students continuing their undergraduate education in the United States after receiving associate degrees. The number of students enrolled as freshmen, however, declined slightly from 1981/82.

The number of foreign students reported in graduate-degree programs increased by 3.7% in 1982/83. Approximately one in every six foreign students in the United States was seeking a master's degree, and one in 12 was working toward a doctorate. The number of students in "other" categories (practical training, non-degree, and intensive English) declined for the second year in a row.

Table 3.6 breaks down foreign-student enrollment by undergraduate and graduate levels for selected years since 1954/55, revealing a significant increase in recent years in the proportion of undergraduates, from a low of 51.7% in 1969/70 to a high of 64.8% in 1982/83.

Enrollment Status

Table 3.7 contrasts the number and percentage of full-time students with part-time students for the academic years 1980/81 through 1982/83. The vast majority of foreign students (91.8%) were enrolled as full-time students (as **Figure 3F** graphically illustrates); this percentage rose slightly in the three academic years shown.

As shown in **Table 3.8**, more foreign students in two-year colleges were enrolled part-time (16.4%) than their peers in four-year schools (6.9%) and a greater proportion of foreign students in public institutions (9.4%) studied part-time than in private institutions (6.0%).

FIGURE 4A

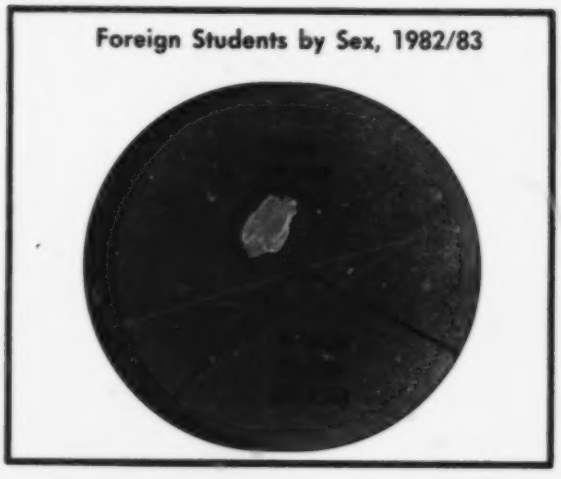

FIGURE 4B

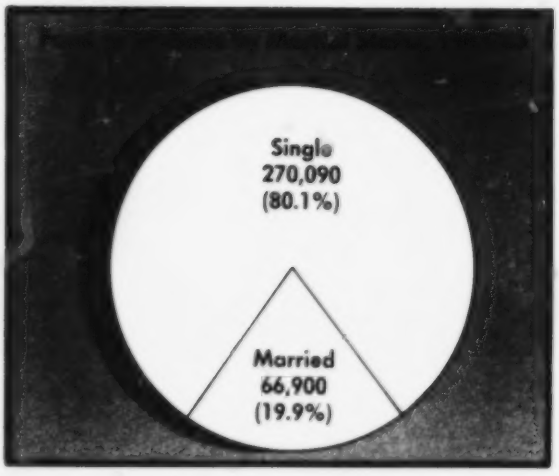

Distribution of Foreign Students by Sex

As **Figure 4A** illustrates, the foreign-student population in 1982/83 was 70.9% male and 29.1% female, with 238,910 men and 98,080 women reported in the census. Gender ratios, summarized in **Table 4.0** for selected years from 1954/55, show a gradual increase in the proportion of women students since 1959/60.

Table 4.1 contrasts gender distribution in two-year and four-year institutions and in public and private institutions for the academic years 1980/81 through 1982/83. Though proportional gains by women were small, they were persistent in both two-year and four-year institutions and in public institutions. In private institutions the percentage of women dropped slightly to 30.4% from 1981/82's 30.7%.

Marital Status of Foreign Students

Approximately 80% of all foreign students reported in 1982/83 were unmarried (**Figure 4B**); **Table 4.2** shows that this percentage remained basically unchanged for the last three surveys.

Differences in the marital status of foreign students among the four types of institutions are shown in **Table 4.3**. A higher proportion of single students enrolled in two-year institutions (87.0%) than in four-year institutions (79.1%). In contrasting public institutions with private, the differences were smaller: single students made up 83.0% of the foreign-student body in private institutions and 78.4% in public institutions.

Primary Sources of Funds of Foreign Students

More than two-thirds of students for whom this information was reported (67.8%) paid for their education in 1982/83 primarily with personal and family funds (**Table 4.4** and **Figure 4C**). For 12.8% of foreign students, their primary source of income was their home government; another 8.9% were supported primarily by colleges and universities. These three sources provided primary funding for 89.5% of all foreign students in 1982/83.

Primary sources of funding for the remaining 10.5% of foreign students were private sponsors, both foreign (2.8%) and U.S. (1.8%), the U.S. government (2.2%), employment (2.4%), and other sources of funding (1.3%).

Figure 4C also identifies sources of funds originating in the United States and separates them from foreign sources (including personal and family funds). A far smaller portion of primary support (15.3%) came from U.S. sources, while the majority (83.4%) originated outside the United States.

Table 4.4 and **Figure 4D** provide a breakdown of the primary sources of funds for foreign students for the last three Census years. As already noted, the majority of students relied primarily on personal and family funding for their education; this majority grew from 67.4% in 1980/81 to 67.8% in 1982/83. Also increasing in importance as primary sources of funding were private sponsors (both foreign and U.S.) and employment. Though 60 additional students reported the U.S. government as their primary source of funds in 1982/83, its relative importance as a funding source remained unchanged. Declining in absolute as well as relative importance as primary sources of funds were home governments and colleges or universities.

Funds from U.S. Sources

Two- and Four-Year Institutions

The percentage breakdown of primary funding sources is provided in **Table 4.5** for each type of institution. Most significant was the almost negligible role played by two-year colleges as primary sources of funding. Less than one percent of students (0.4%) in two-year institutions reported colleges or universities as their primary source of funds, compared with 10.5% of students enrolled in four-year institutions. Far greater was the percentage of two-year college students who depended on personal and family funds to obtain their education (80.4%, compared with 65.4% in four-year schools). The percentage of two-year students reporting the U.S. government as their primary source of funds (4.3%) was slightly above the percentage for all foreign students (2.2%), while the proportion of two-year students relying on funding from their home government was lower (8.7%, compared to 12.8%).

Public and Private Institutions

The primary funding pattern was similar for both public and private institutions. Slightly larger proportions of students in public schools relied on personal and family (68.3%) or on home government sources (13.8%) for support than their counterparts in private schools (66.9% and 11.2%). In private schools, however, larger percentages of foreign students obtained support from colleges and universities (10.6%) or from

FIGURE 4D

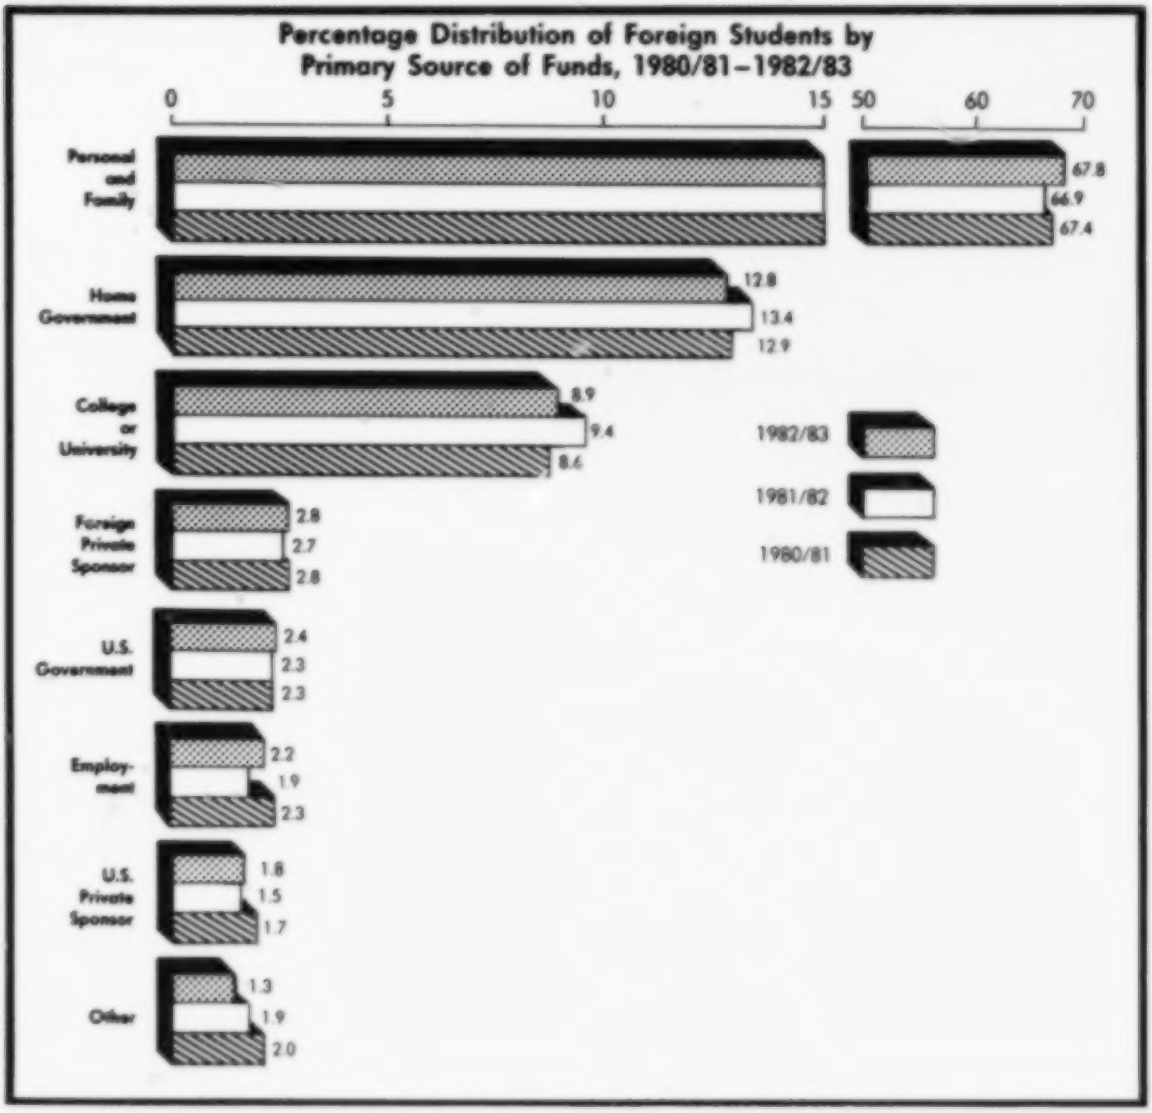

FIGURE 4E

private sponsors (3.5%) than did their public-school counterparts.

Visa Types

Figure 4E illustrates the visa status of foreign students in the academic year 1982/83. The vast majority, 84.0%, were in the United States on F visas, the visa for students pursuing a full program of study, while 7.2% held J visas, the exchange-visitor visa for students or trainees in sponsored programs. Refugees accounted for 3.6% of the foreign student body in 1982/83.

Table 4.6 tabulates foreign students by their visa type from 1980/81 to 1982/83. Though most students reportedly held F visas, the number holding J visas gradually increased, while the number of refugee students declined.

Comparative breakdowns by visa type of students in two-year and four-year schools are provided in **Table 4.7**. Two-year schools showed a slightly different mix of students than did the four-year schools, with lower percentages of students on F and J visas and a much higher percentage of refugees—15.2% compared with 1.7%. These differences are illustrated in **Figure 4F**.

Table 4.7 shows the visa status of students in public and private institutions, illustrated in **Figure 4G**. While differences were slight, a notably lower percentage of students in private institutions were refugees, 1.2% compared with 4.9% in public institutions.

FIGURE 4F

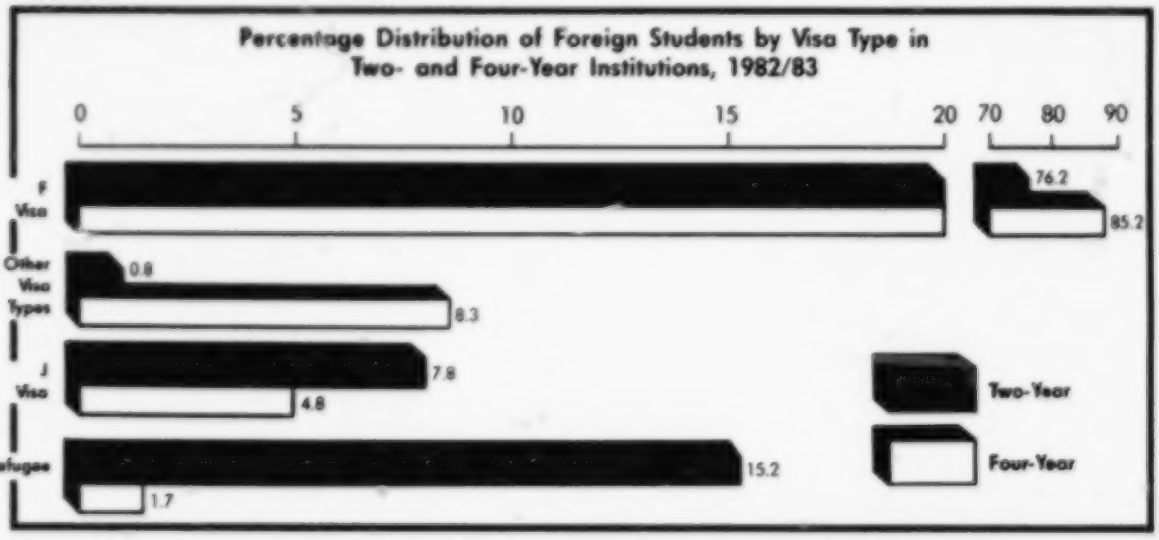

FIGURE 4G

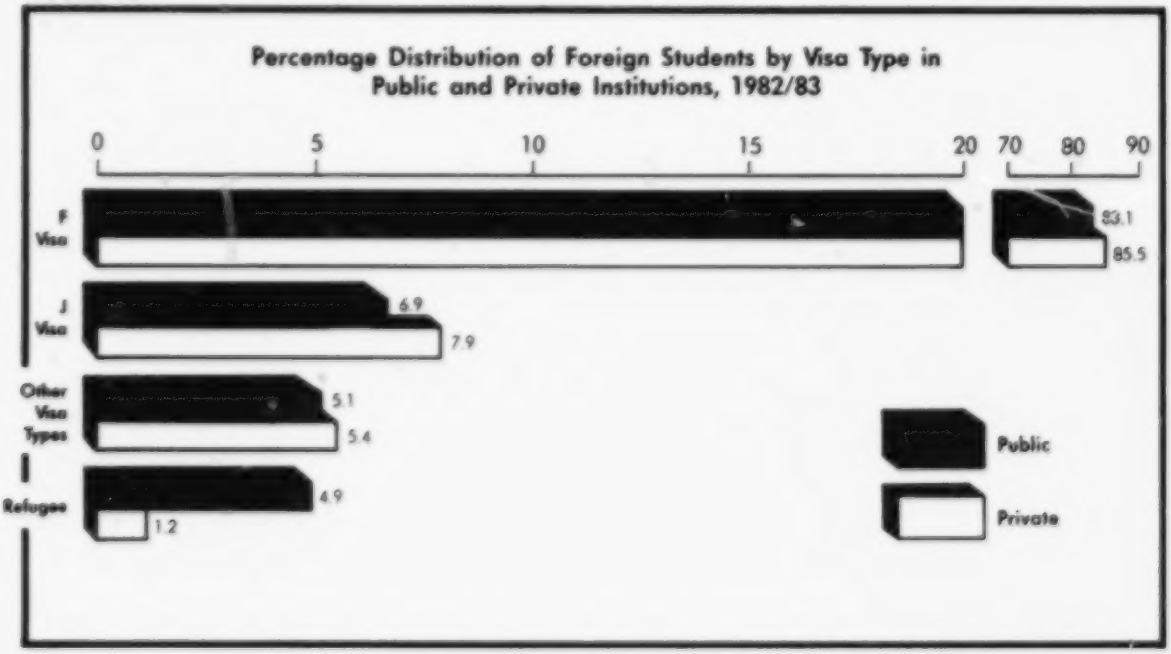
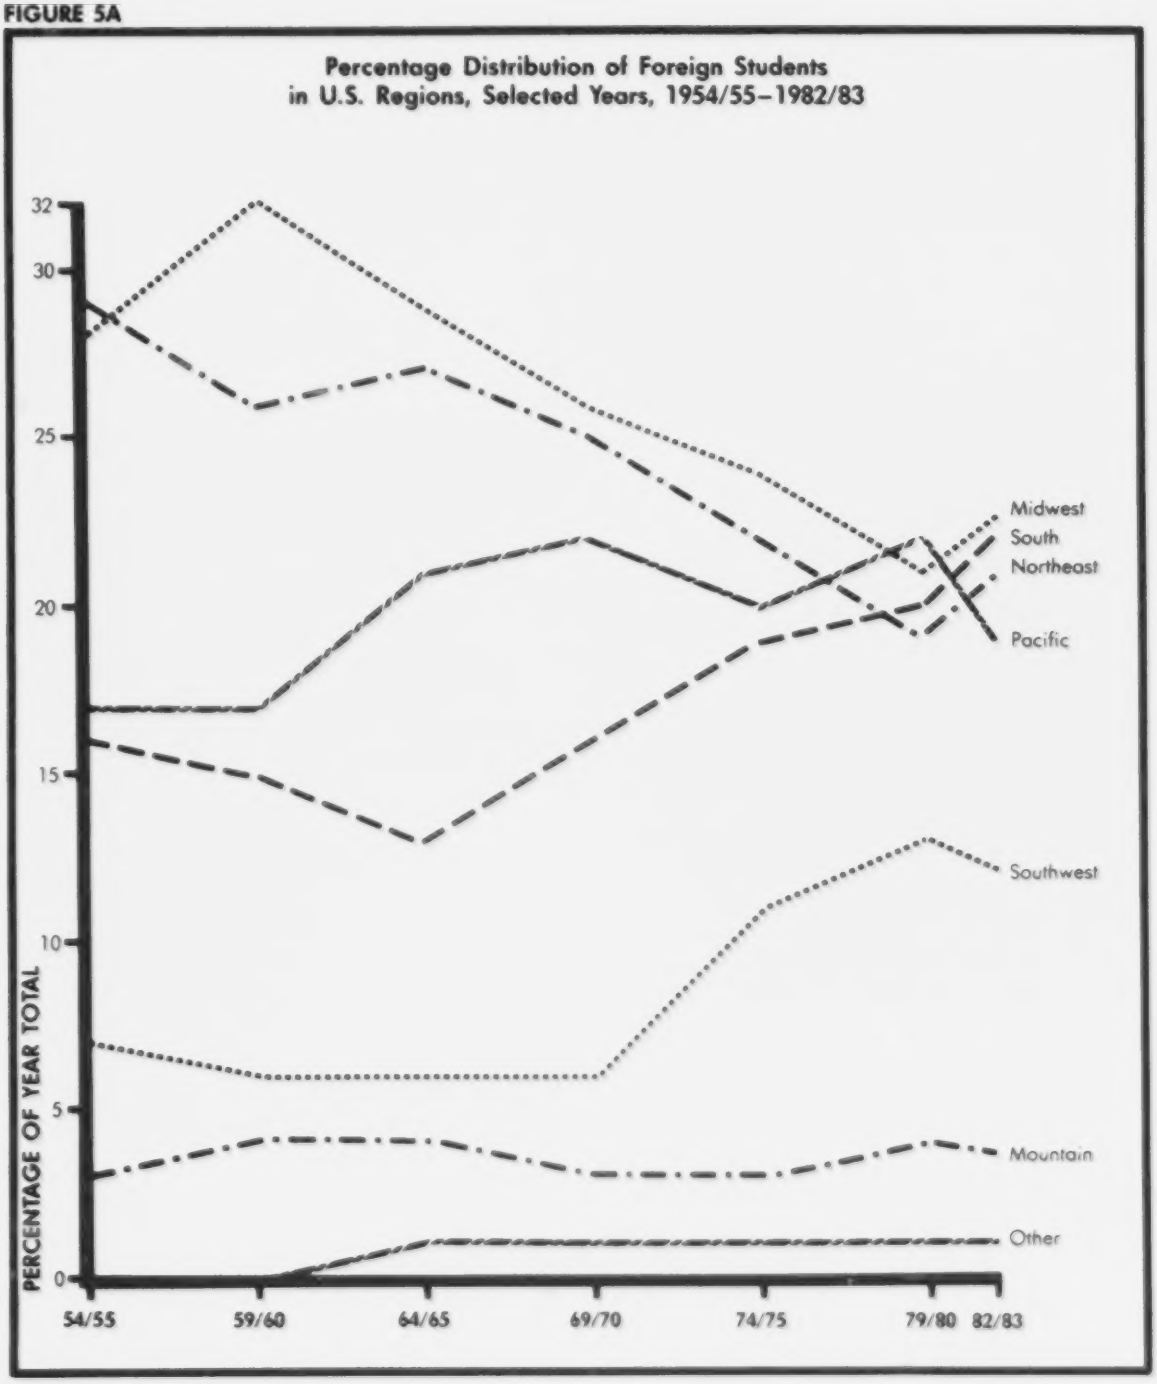


5. DISTRIBUTION OF FOREIGN STUDENTS BY STATE

FIGURE 5A



Regions of the United States

The number of foreign students reported in each region of the United States in 1981/82 and 1982/83 is listed in **Table 5.0**, along with the percentage change. The South, with the second largest number of students (74,536), had the greatest percentage increase (7.4%), followed by the Midwest and Southwest (5.7% and 5.4%, respectively). The Northeast increased at a rate slightly higher than the average rate for all foreign students. Both the Mountain and Pacific regions reported declines in the number of foreign students, while the largest decline occurred in the "other" category (-31.1%), due to the loss of the Panama Canal Zone as a U.S. territory. The Midwest was the most popular region for foreign students in 1982/83—a position it has held for most years since the late 1950s.

Foreign students were fairly evenly distributed among major regions of the United States, with 84.0% almost equally divided among the Northeast, South, Midwest, and Pacific regions, as shown in **Table 5.1**. (See **Appendix 5** for the list of states within each region.) The Southwest had 12.2% and the Mountain region 3.4% of all foreign students.

Foreign students have not always been so evenly distributed in the United States. From 1954/55 to 1969/70 more than one-half of all foreign students studied in the Northeast and Midwest. In 1959/60, the Midwest region had almost one-third of all foreign students reported, as shown in **Figure 5A**.

Changes in the relative positions of the regions can be seen in **Table 5.1**. The Northeast, which had the most foreign students in 1954/55, was in third place in 1982/83. As recently as 1974/75 the South was in fourth place among the regions, but it closely followed the Midwest in 1982/83, reporting its largest percentage of all foreign students ever, 22.1%.

While foreign students as a whole were evenly distributed among U.S. regions in 1982/83, **Table 5.2** and **Figure 5B** show that students from different world regions favored specific U.S. regions.

Comparatively few students from any region studied in the Mountain region of the United States. Africans enrolled in the South (28.7%) and Midwest (25.3%) in much higher proportions than in other regions. Europeans favored schools in the Northeast (32.3%) and Midwest (21.5%), while fewer than average chose schools in the Southwest (7.6%). More than one-third of all Latin Americans were enrolled in schools in the South, while comparatively fewer (8.9%) chose schools in the Pacific region.

Middle Eastern students were distributed among U.S. regions in proportions close to those for all foreign students, although somewhat fewer (16.1%) were reported in the Northeast and more (21.0%) in the Pacific region. North Americans, mainly Canadians, were clustered in the regions close to the border, with 29.4% in the Midwest, 26.5% in the Northeast, and 9.4% in the Mountain region. Students from Oceania and South and East Asia also appeared to be influenced by geography; 39.6% of Oceania students chose schools in the Pacific region, while students from South and East Asia favored the Pacific (22.6%) and Midwest (28.2%) regions.

Table 5.3 shows the distribution of foreign students from the 15 leading countries of origin among the regions of the United States. This table details some of the patterns seen in **Table 5.2**.

Several countries showed markedly high or low preference (approximately ±10%) for a region. In the Northeast (which had a foreign student share of 20.4%), countries with large variations in regional enrollment were Malaysia (9.4%), Saudi Arabia (7.9%), Mexico (11.3%), and India (29.6%). Four countries had large variations in the South (which had a 22.1% share): Nigeria (31.2%), Venezuela (40.0%), Mexico (10.3%), and Hong Kong (8.6%).

In the Southwest (with 12.2% of all foreign students), Mexico sent a noteworthy 41.5% of its students to that region. Students from Malaysia (48.5%), Canada (30.1%), and Jordan (32.5%) showed a greater preference for the Midwest, which had 22.3% of all foreign students.

The Pacific region (19.2% of all foreign students) had a disproportionately large share of students from Japan (34.3%), Saudi Arabia (28.9%), and Hong Kong (35.3%). It also had a relatively small share of Nigerian (6.4%), Venezuelan (8.3%), and Indian (8.6%) students.

Table 5.4 provides another view of the distribution patterns of foreign students in the United States, giving for each U.S. region, the percentage breakdown of enrollment from each of the seven world regions. These data are illustrated in **Figure 5C**.

* Canal Zone no longer a U.S. territory.

Comparing the regional distribution against U.S. totals, the higher proportion of Europeans who chose to study in the Northeast (15.2% compared with the U.S. total of 9.4%) is again evident, as is the higher proportion of Latin Americans in the South (29.4% compared with 16.9%). The Southwest had a slightly higher percentage of students from Africa (15.7% compared with the U.S. total of 12.7%) and a slightly lower percentage of Europeans (5.6% compared with 9.4%) and North Americans (2.1% compared with 4.3%). The Midwest had a lower proportion of Latin Americans (11.4% compared with 16.9%) and a higher proportion of South and East Asians (40.8% compared with the U.S. total of 35.5%), surpassed only by the Pacific region, with 45.9% of its foreign-student body coming from South and East Asia. The Pacific region also had a lower proportion of Africans (6.4%) and Latin Americans (8.5%) than U.S. totals (12.7% and 16.9%, respectively). As previously noted, the Mountain region had a larger share of North Americans (12.4%) than the U.S. total (4.3%).

Distribution of Foreign Students by State

The number of foreign students reported in 1982/83 in each U.S. state and territory is listed in **Table 5.5**, along with figures for 1981/82 and the percentage change. The distribution among states is illustrated in **Figure 5D**.

The 3.3% overall increase in the number of foreign students from 1981/82 to 1982/83 was not evenly divided among the states and territories. Substantial percentage increases in the number of foreign students were reported by eight states: Alaska (15.1%), Arkansas (23.2%), Delaware (26.5%), Louisiana (24.7%), Montana (17.4%), Nebraska (21.1%), New Hampshire (22.8%) and Rhode Island (32.0%), and by the territory of Guam (15.4%). North Dakota and the Virgin Islands reported the largest percentage decreases in the number of foreign students (19.9% and 23.8%, respectively).

The states with the most foreign students are listed in **Table 5.6** for five-year intervals since 1954/55. The 1982/83 enrollments are illustrated in **Figure 5E**. California dominated in 1982/83, with 20,642 more students than the next leading state, New York. California has had the most foreign students since 1957/58, when its foreign-student enrollment surpassed that of New York. New York, third in 1979/80 and second in 1980/81 and 1981/82, remained in second place, with a percentage share of 8.6%. Texas, second in 1979/80, was third in 1981/82 and also in 1982/83 (with 7.9% of all foreign students).

The fourth largest state, Florida (5.2%), was in sixth position in 1979/80. It jumped in rank with a dramatic 36.4% increase in foreign students in 1980/81. The remaining five states and the District of Columbia showed little change in their share of the foreign-student enrollment from 1979/80 to 1981/82.

Table 5.6 also shows the 10-state total for each year listed and the percentage it represents of total reported U.S. foreign-student enrollment for that year. Over the

TOTAL	**336,985**	**188**

29-year history of the Census, this percentage declined from 64.1% in 1954/55 to 59.0% in 1979/80, fluctuating since then at around 59% and suggesting that foreign students tend to be slightly more evenly distributed in the United States in recent years than they were when the Census began.

Figure 5E graphs the percentage share of the six states with the largest enrollment in 1982/83 and looks at that share over the 29-year Census period. This figure shows how well the major states have kept up with the rapid growth of foreign students, with increases in percentages for Texas, Massachusetts, Ohio, and the District of Columbia, while New York, Florida, Illinois, Michigan, and Pennsylvania maintained their shares. California was the only state in this group that had a lower percentage of all foreign students than the previous year.

Table 5.7 shows the variations in the distribution of foreign students from the leading countries of origin among the 10 states with the highest enrollments, as well as state and U.S. totals. Data in this table are charted in **Figure 5F**.

Some of the most notable variations occurred in California, which had 14.8% of all foreign students. California had disproportionately high percentages of students from Iran (21.3%) and Japan (22.1%), but only 4.7% of all Nigerian students, 6.6% of Indians, and 6.9% of Venezuelans.

New York, with 8.6% of all foreign students, had a larger percentage of Indians (11.8%) than the other leading states, but a very small percentage of Saudi Arabians (1.2%). Texas had higher proportions of Taiwanese (13.8%) and Nigerians (14.4%) and lower proportions of Japanese (3.1%) and Canadians (4.0%) than it did of all students (7.9%).

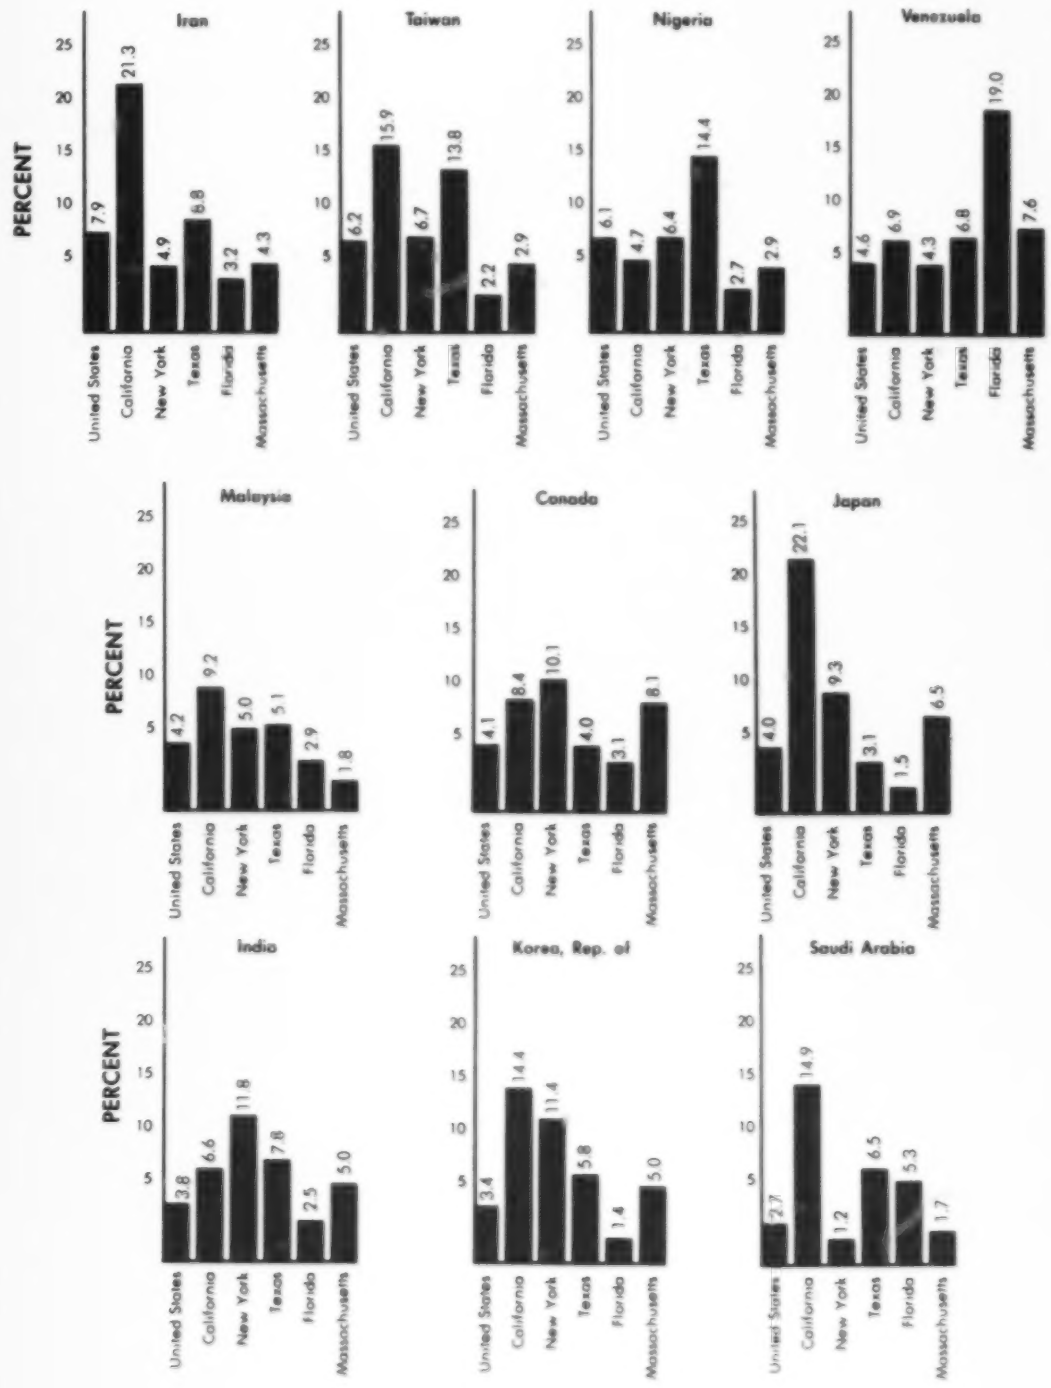
Other notable variations were higher proportions of Canadians (14.3%) in Michigan, Malaysians (13.4%) in Illinois, and Venezuelans (19.0%) in Florida than the proportions of all foreign students in those states.

The number of nationalities of foreign students and the total enrolled in each state are shown in **Table 5.8**. Of the 188 countries and territories which sent students to the United States, 167 nationalities were represented in New York, which had 29,073 foreign students. California's 49,715 foreign students represented 157 nationalities. There were 155 nationalities among the District of Columbia's 10,536 students, 150 in Florida (17,394), 149 in Michigan (12,771), and 146 in Massachusetts (16,075) and Ohio (12,001). Other states with high foreign-student enrollment also had large numbers of reported nationalities: among 13,781 students in Illinois, 145 nationalities were reported; in Texas there were 26,577 students of 144 nationalities, and in Pennsylvania, 11,021 students of 143 nationalities.

Several states with substantially small foreign-student populations (less than 5,000 students) had large numbers of reported nationalities: Arizona had 126; Connecticut, 125; Minnesota, 124; and Tennessee, 123.

FIGURE 5F

Percentage Distribution of Students from the 10 Leading Countries of Origin in the States with the Highest Foreign-Student Enrollments, 1982/83



6. DISTRIBUTION IN TWO- AND FOUR-YEAR INSTITUTIONS

Compared with the total U.S. student enrollment, a much higher proportion of foreign students attended four-year institutions in 1982/83. As **Figure 6A** shows, 85.8% of all foreign students reported were enrolled in four-year institutions, while the total student proportion was 61.6%.

Table 6.0 shows the percentage distribution of foreign students in two- and four-year institutions and the corresponding percentages for all U.S. students for selected years since IIE first tabulated data on two-year institutions in 1970/71. The percentage of foreign students enrolled in two-year institutions rose steadily to a peak in 1980/81 of 17.4%, but declined to 14.2% by 1982/83. In contrast, the percentage for all students enrolled in two-year institutions continued to climb and was 38.4% in 1982/83.

Table 6.1 lists the number and percentage distribution of foreign students in two- and four-year institutions for each state, illustrated in **Figure 6B**. Several states showed significantly larger percentages of two-year college students: Florida (40.8%), Idaho (37.8%), and Maryland (37.7%). States with a significantly larger proportion of foreign students in four-year institutions were the District of Columbia and Rhode Island (100.0% each), South Dakota (99.4%), Vermont and West Virginia (99.3% each), Puerto Rico (98.7%), Maine (98.5%), New Hampshire (98.4%), and Montana (98.3%).

Table 6.2 provides three-year comparisons of the percentages of foreign students from leading countries of each world region enrolled in two- and four-year colleges. For the last three Census years proportions of Latin American students enrolled in two-year institutions were above the average for all foreign students. In four regions (Africa, Europe, Latin America, and North America) these proportions increased slightly from 1981/82 to 1982/83, in contrast to the declining trend for all foreign students.

Among countries of origin, those with the greatest proportion of students enrolled in two-year institutions in 1982/83 were Venezuela (25.0%), Kuwait (24.1%),

TABLE 6.0

FIGURE 6B

Colombia and Ethiopia (22.6% each), and Jordan (22.3%). In South and East Asia, Japan is worth noting because its 16.2% proportion, while approximating the foreign-student average of 14.2%, was almost double the regional average of 9.2%.

Although foreign-student enrollment has tended to decline proportionally in two-year institutions, certain countries showed consistent increases over the three-year period: Ethiopia, Venezuela, Colombia, Malaysia, and India.

Countries worth noting due to larger-than-average decreases over the three-year period were: Libya, which dropped from 21.7% in 1980/81 to 9.4% in 1982/83; Iran, from 19.5% to 7.9%; and Jordan, from 34.5% to 22.3%.

For students enrolled in four-year institutions, only slight deviation from the average is noted at the regional level. However, in 1982/83 four countries in South and East Asia showed proportions of more than 95% of students in four-year institutions: Taiwan (98.4%), India (96.8%), the Republic of Korea (95.8%), and Malaysia (95.4%).

Table 6.3 provides the percentage distribution of students from OPEC countries in two- and four-year institutions. As a group, these countries sent a slightly lower proportion of students to two-year colleges than did all countries, a shift from recent years. The proportion of OPEC students in two-year institutions declined from 1980/81 to 1982/83.

Gabon (100.0%) and Algeria (98.8%) had substantially greater proportions of students in four-year institutions than the OPEC average of 86.4% in 1982/83. In two-year institutions, Qatar (28.1%), Venezuela (25.0%), and Kuwait (24.1%) had substantially greater proportions than the 13.6% OPEC average. The proportion of Venezuelans in two-year institutions rose steadily over the three years, in contrast to the general downward trend.

Two-Year Institutions

The number of foreign students reported in two-year institutions in 1982/83 was 47,912, a decrease of 2,361 students or 4.7%. As **Table 6.4** indicates, these students were distributed unevenly in the United States. Eleven states or territories had more than 1,000 students each, 25 had between 100 and 1,000, 15 had less than 100, and three had no two-year students. Twenty-eight states showed a decrease in the number of two-year foreign students, 22 showed an increase, and four showed no change.

The six states with the greatest decrease of enrollment of foreign students in two-year institutions were California, which declined by 1,019 students; Connecticut, 451 students; Illinois, 442 students; Washington, 301 students; Florida, 266 students; and Texas, 252 students. In addition, two states showed large percentage decreases: Oregon (-24.3%) and Puerto Rico (-93.2%). Those states showing the greatest increases in foreign students were Louisiana, which gained 508 students; Massachusetts, 433 students; New York, 219 students; and Ohio, 139 students. A number of states showed

sizable percentage increases in their foreign-student population: South Dakota (300.0%), New Hampshire (42.9%), Montana (30.0%), Delaware (30.0%), Wyoming (25.0%), Hawaii (21.4%), West Virginia (20.0%), North Dakota (18.8%), and Arkansas (17.6%). **Table 6.5** shows that the 10 states with the largest enrollment accounted for approximately three-quarters of all foreign students in two-year institutions.

Table 6.6 lists the two-year institutions reporting the largest number of foreign students in 1982/83 and compares enrollments and rank with 1981/82 figures. There were slight changes in ranking but not colleges from the previous survey. The two-year institution with the most foreign students in 1982/83 was Miami-Dade Community College with 4,186 students. This was a 9.4% decrease from Miami-Dade's 1981/82 enrollment of 4,622. Miami-Dade had more than four times the number of foreign students reported by the two-year institution with the second-largest foreign student enrollment—Santa Monica College (927 students).

As a group, the 10 largest institutions continued to account for a substantial percentage (22.3%) of all foreign students in two-year institutions. Miami-Dade Community College alone accounted for 8.7%.

Four-Year Institutions

The number of foreign students in four-year institutions in 1982/83 was 289,073, a 4.7% increase over the 276,026 students reported in 1981/82. The number of foreign students ranged from 162 in Alaska to 37,390 in California. Ten states or territories had 10,000 or more foreign students in four-year institutions, 30 had between 1,000 and 10,000 students, and 14 had fewer than 1,000.

Comparison of data from 1981/82 and 1982/83 in **Table 6.7** shows that 12 states or territories declined in enrollment, while 42 increased. States showing the greatest decrease of foreign students were California,

TABLE 6.8

States with the Highest Foreign Student Enrollment in Four-Year Institutions, 1982/83

State	Foreign Students	Percentage of All Four-Year Foreign Students
California	37,390	12.9
New York	26,628	9.2
Texas	23,153	8.0
Massachusetts	14,987	5.2
Illinois	11,929	4.1
Ohio	11,147	3.9
Michigan	10,839	3.8
District of Columbia	10,536	3.6
Pennsylvania	10,447	3.6
Florida	10,303	3.6
TOTAL 10 HIGHEST	167,359	57.9

with 786 fewer students; Kentucky, 227 fewer; Oregon, 221 fewer; North Dakota, 169; and Tennessee, 165. The Virgin Islands (-23.8%) and North Dakota (-23.4%) showed the largest percentage decreases. States and territories with the greatest increase in foreign students in four-year institutions were Texas, with 2,432 more enrollees; Louisiana, 1,261 more students; the District of Columbia, 848; Wisconsin, 822; and Illinois, 806. Those showing large percentage increases were: Delaware (26.1%), Alaska (23.7%), Arkansas (23.4%), Guam (22.8%), Nebraska (22.7%), New Hampshire (22.5%), and Puerto Rico (21.9%). As **Table 6.8** shows, over half (57.9%) of foreign students were concentrated in the 10 states with the largest enrollments.

Table 6.9 lists the enrollments and ranks of the 10 four-year institutions with the greatest number of foreign students reported in 1982/83, and compares these figures with 1981/82 data. The University of Southern California continued to enroll the most students; the University of Texas at Austin moved to second place from fifth in 1981/82, with an increase in enrollment of 26.5%. Columbia University dropped to third, reflecting a 9.0% drop in foreign-student enrollment. The 10 largest institutions continued to account for just under 10% of the total number of foreign students enrolled in four-year institutions.

TABLE 6.9

Four-Year Institutions with the Highest Foreign-Student Enrollments, 1981/82–1982/83

Rank		Institution	Foreign Students		Percentage Change
1981/82	1982/83		1981/82	1982/83

Percentage of all four-year institutions			**8.8***	**9.0**	—
TOTAL, ALL FOUR-YEAR INSTITUTIONS			**276,026**	**289,073**	**4.7**

* Totals are for the 10 leading four-year institutions of 1981/82, which include Texas Southern University (ranked sixth), University of California, Los Angeles (ranked eighth), and Northeastern University (ranked ninth).

7. DISTRIBUTION IN PUBLIC AND PRIVATE INSTITUTIONS

Just less than two-thirds of all foreign students reported in the United States in 1982/83 were enrolled in public institutions. As **Table 7.0** shows, this proportion changed only slightly over the last eight survey years. **Table 7.0** also shows a consistent difference in the public/private ratio between foreign students and the total U.S. student population: more than three-quarters of all students have been enrolled in public institutions since 1975/76; as **Figure 7A** illustrates, in 1982/83 that compared with 65.0% of foreign students.

The ratio of foreign students in public and private schools varied widely from state to state—from over 95% public in two states to only 8.8% in the District of Columbia, as shown in **Table 7.1**. Three states had more than 80% of their foreign students enrolled in private schools: the District of Columbia (91.2%), Vermont (84.8%), and Massachusetts (84.0%). Six states reported more than 90% of their foreign students enrolled in public schools. Wyoming (100.0%), Nevada (95.3%), North Dakota (94.3%), Arizona and Delaware (93.7% each), and New Mexico (92.9%); the territories of Guam and the Virgin Islands reported 100%. **Figure 7B** illustrates the data in **Table 7.1**, ranking the states in descending order by percentage of foreign students in public schools.

The proportion of foreign students in public and private institutions from 1980/81 to 1982/83 is shown in **Table 7.2** for the leading countries within major world regions.

Among the countries with the highest percentage of students in public institutions were the two countries with the most students in the United States, Iran and Taiwan. Malaysia had the highest reported percentage of students in public institutions in 1982/83 (79.7%); that proportion grew steadily over the years surveyed. Following were Jordan (77.8%), Iran (74.9%), and Taiwan (74.2%).

Four countries had more students enrolled in private institutions than in public institutions: Italy (60.8%), Canada (56.5%), France (55.7%), and Jamaica (50.3%). Other leading countries with relatively high proportions of students in private institutions were the United Kingdom (48.8%), Greece (46.4%), and Japan (45.9%). The proportion of Japanese students enrolled in private institutions rose steadily over the three survey years.

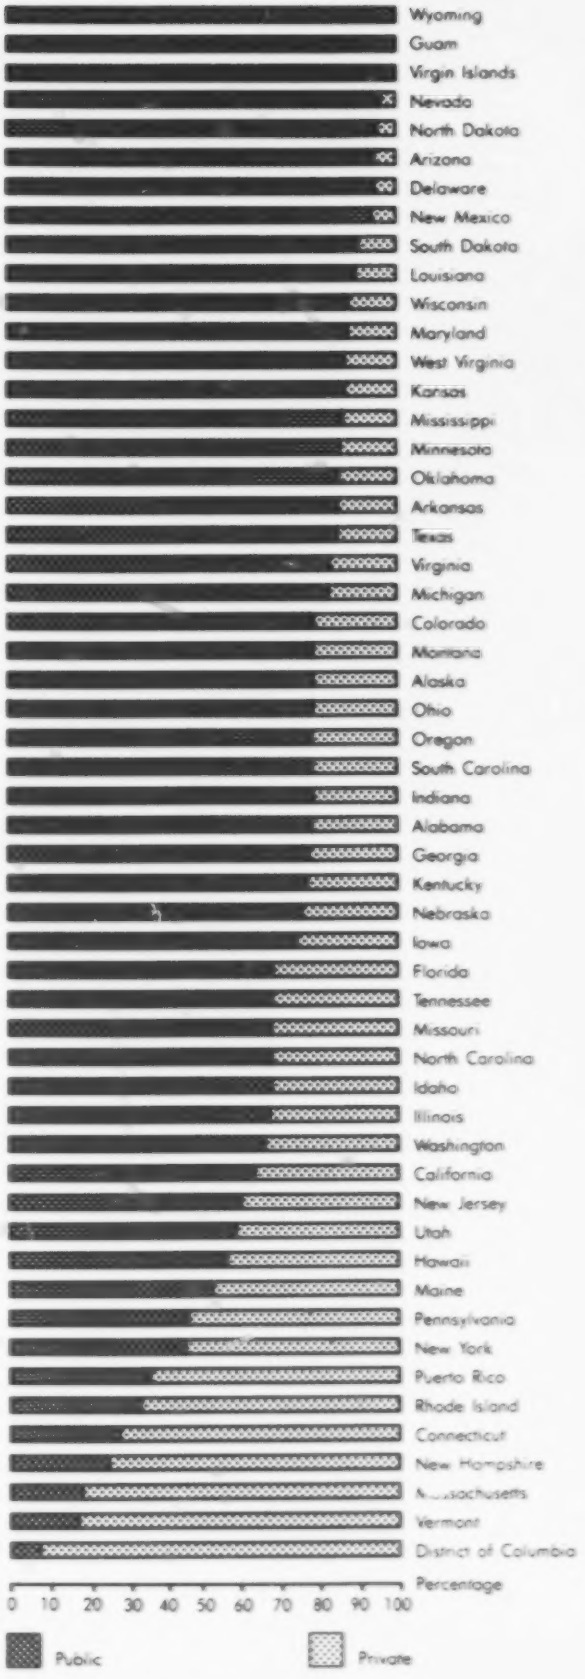
FIGURE 7B



A slightly higher-than-average proportion of students from OPEC countries were enrolled in public institutions (67.8%) in 1982/83. As **Table 7.3** shows, this percentage declined from 1980/81 to 1982/83. Iran had the greatest proportion of students; its percentage increased during the last three years. Six OPEC countries had disproportionate enrollments of more than 40% of their students in private institutions: Gabon (76.5%), Algeria (49.0%), Indonesia (44.5%), United Arab Emirates (43.2%), Ecuador (42.7%), and Kuwait (42.4%).

Public Institutions

The number of foreign students reported in public institutions in 1982/83 was 218,940, a 3.2% increase over the number reported in 1981/82.

Table 7.4 shows the distribution of foreign students in public institutions by state for the last two surveys, as well as the percentage change. Five states increased enrollment in public schools by more than 500 students: Texas (1,830), Louisiana (1,708), New York (1,524), Ohio (967), and Wisconsin (644). The states which showed the largest percentage increase, however, were Rhode Island with 186.0% (but only 240 students), Arkansas (34.3%), Vermont (31.8%), Louisiana (27.4%), Delaware (27.1%), and Alaska (22.6%).

Two states manifested substantial declines in the numbers of foreign students in public institutions: California (1,564 students) and Washington (693 students). The states showing the largest percentage declines were Connecticut (a 25.8% drop) and North Dakota (-21.3%).

Foreign students in public institutions were unevenly distributed among the states. **Table 7.5** shows that approximately one-quarter of these students were enrolled in two states, California (with 30,972 students) and Texas (22,068). Substantially smaller numbers of students were located in the eight next-largest states, which had between 5,000 and 13,000 students each. Together these 10 states enrolled 58.2% of all foreign students in public schools.

Table 7.6 lists the public institutions with the largest reported number of foreign students in 1982/83. Miami-Dade Community College remained in uncontested first place with 4,186 foreign students reported; although enrollment declined by 9.4%, Miami-Dade still had 1,242 students more than second-place University of Texas at Austin (2,944 students). The greatest growth in enrollment (26.5%) was shown by the University of Texas at Austin and the greatest decline by Miami-Dade. Together the top 10 institutions accounted for 11.6% of foreign students enrolled in public institutions.

It is noteworthy that: (1) With the exception of the University of Minnesota, these schools are located in the 10 states with the highest proportions of public-school students. (2) These schools apparently dominate

TABLE 7.5

States with the Highest Foreign-Student Enrollments in Public Institutions, 1982/83

State	Foreign Students	Percentage of All Foreign Students in Public Institutions
California	30,972	14.2
Texas	22,068	10.1
New York	12,793	5.8

New Jersey	2,445	2.1
TOTAL, 10 HIGHEST	**83,756**	**70.9**

the foreign-student enrollment in their respective states. (3) The most populous state, California, is not represented by an institution among the top 10.

Private Institutions

The number of foreign students reported in private institutions rose from 114,127 in 1981/82 to 118,045 in 1982/83, an increase of 3.4%, only slightly higher than the increase shown by public schools (3.2%).

Table 7.7 shows that this growth was not evenly distributed among the states and territories. The District of Columbia posted the greatest numerical increase of private-school students, 845, for a 9.6% growth. Florida was second in growth (627 more students) and Washington third (420). States that showed the greatest percentage increases were New Hampshire (38.3%), Nebraska (25.9%), Wisconsin (25.7%), and Washington (22.2%). New York posted the largest decrease in enrollment with a loss of 673 students (-4.0%). States that showed high percentage declines were Kansas (16.6% fewer students), Arkansas (-13.2%), and Arizona (-10.7%). Nationwide, 33 states showed increases in foreign-student enrollment in private schools, 16 states had declines, and one state showed no change.

As shown in **Table 7.8**, the three leading states (California, New York, and Massachusetts) and the District of Columbia had 49.2% of all foreign students enrolled in private institutions, whereas nine states or territories had fewer than 100 foreign students in private schools.

Table 7.9 lists the private institutions reporting the largest numbers of foreign students and highlights even more the uneven national distribution of foreign students in private institutions: four of the leading institutions are in the Boston area, two in New York City, and two in the District of Columbia.

As it has for several years, the University of Southern California reported the largest number of foreign students in private institutions: 3,651, a 6.3% increase from 1981/82. Columbia University remained in second place, though it enrolled 279 fewer foreign students in 1982/83 (a 9.0% drop); George Washington University moved into third place with an increase in foreign-student enrollment of 27.5% (554 more students).

There was a greater proportion of foreign students in the 10 leading private institutions (19.6%) than the 10 leading public institutions (11.6%). In contrast to public institutions, however, the proportion of students in the leading private institutions declined slightly from the last survey.

TABLE 7.9

Private Institutions with the Highest Foreign-Student Enrollments, 1981/82–1982/83

Rank		Institution	Foreign Students		Percentage Change

* Totals are for the 10 leading private institutions of 1981/82, which included University of Pennsylvania (ranked tenth).

8. INSTITUTIONS WITH THE MOST FOREIGN STUDENTS

In 1982/83, 70 institutions in the United States reported enrolling 1,000 or more foreign students (**Table 8.0**). By contrast, in 1954/55 only one institution reported enrolling more than 1,000 students. These 70 institutions enrolled 36.2% of the foreign-student population in the United States. Foreign student enrollments as a percentage of total enrollment varied from a low of 3.2% at Arizona State University to a high of 70.5% at Northrop University.

The number of institutions reporting 1,000 or more foreign students decreased for the first time in 1982/83 (from 74 in 1981/82). Moreover, the proportion of all students concentrated in the largest institutions (**Table 8.1**) has declined generally in the last two decades. In 1959/60, for example, the 10 leading institutions reported 22.8% of all foreign students; for the last three surveys the 10 leading institutions accounted for only 8.3% of all foreign students reported.

For most of the years shown since 1954/55 (**Table 8.2**), the 10 institutions reporting the largest number of foreign students have remained fairly stable—seven of the 10 institutions reported in 1954/55 appear on the list in 1974/75. Greater changes occurred in the last few years, leaving only four of the original 10 institutions consistently included: the University of Southern California; Columbia University (including Barnard and Teachers College); the University of Wisconsin, Madison; and the University of Michigan, Ann Arbor.

Table 8.3 focuses on those institutions with the highest proportions of foreign students in their student body; the 10 leading institutions are illustrated in **Figure 8A**. While the overall proportion of foreign students enrolled in U.S. higher education was 2.7%, a number of institutions with 1,000 or more foreign students had substantial proportions of foreign students as well.

TABLE 8.0

Institutions with 1,000 or More Foreign Students, 1982/83

Rank	Institution	Foreign Students	Total Enrollment*	Foreign Student Percentage of Total Enrollment

Among the 10 institutions listed in **Table 8.2** as enrolling the most foreign students, five appear in **Table 8.3** and **Figure 8A** with high percentages of foreign students: Southern Illinois University, Carbondale, Miami-Dade Community College, the University of Southern California, Columbia University, and George Washington University. The group of all institutions with 1,000 or more foreign students had 6.9% of its total enrollment as foreign students.

The institutions reporting a foreign enrollment of 100 or more nationalities are listed in **Table 8.4**. American University and Boston University, which ranked 34th and 11th respectively in numbers of foreign students, had the largest number of reported nationalities, 116 each. These institutions were followed by the University of Wisconsin, Madison (113), George Washington University (112), and the University of Florida (110). Two institutions reported enrolling students from 109 countries and territories, three reported 107, and an additional 10 reported 100 or more nationalities in their foreign-student bodies.

* This figure was obtained from the Office of admissions and records at Northrop University.

Part II: EXPENDITURES FOR LIVING COSTS BY FOREIGN STUDENTS IN THE UNITED STATES

These calculations of the estimated expenditures for living costs by foreign students in the United States are based on information from two sources: (1) the number of foreign students reported for 1982/83 in the Annual Census and (2) the recommended Monthly Maintenance Rates for 1983/84 published by the Institute of International Education.

The Monthly Maintenance Rates (MMR) for foreign students are figures which IIE calculates for each U.S. institution of higher education, based on guidelines established by an advisory committee comprising representatives from universities, foundations, and government. These rates enable universities, government, and organizations sponsoring foreign-student programs to set allowances for foreign students. MMRs have been published by IIE since the 1950s. (See *Costs at U.S. Educational Institutions*, Douglas R. Boyan, ed. New York: Institute of International Education, annual.)

The MMR calculations are based upon the Bureau of Labor Statistics (BLS) estimates of intermediate-level family budgets and comparative indexes of selected urban areas with adjustments to reflect inflation and special foreign-student needs. Since BLS rates vary in different regions of the United States and between urban and nonmetropolitan areas, IIE has identified each institution with its appropriate BLS area—thereby providing it with a specific MMR. *It should be noted that the MMR is for living costs only;* it does not include expenditures for tuition, fees, books, insurance, special equipment, travel, or dependents.

For this section of *Open Doors*, two tables have been produced. **Table 9.0** uses the average estimated MMR for the entire United States for 1983/84 ($594), multiplies it by nine (a nine-month academic year), and multiplies that number by the number of foreign students reported in each state. This gives an estimate of the total expenditures for living costs by foreign students for each state.

Table 9.1 provides similar calculations for living costs for metropolitan areas using the specific MMR for each area. **Figure 9A** illustrates the estimated expenditures by foreign students in the states with the 10 highest such figures.

* Estimated expenditures are based on the number of foreign students reported in academic year 1982/83, multiplied by the metropolitan area's monthly maintenance rate for academic year 1983/84 multiplied by nine months.

Part III: INTENSIVE ENGLISH LANGUAGE PROGRAMS

Background

Four years ago, at the request of the Interassociational Committee on Data Collection (ICDC), IIE conducted an exploratory survey of intensive English language programs (IELPs) to determine the number of nonimmigrant foreign students enrolled. The results of that survey, detailed in *Open Doors: 1978/79*, indicated that a significant number of foreign students were enrolled in IELP institutions. Since it was felt that these students constituted a substantial pool for entry into full-time academic programs, the ICDC urged establishment of an annual survey of IELP institutions to monitor any major changes.

The Survey

Using *English Language and Orientation Programs in the United States* (Institute of International Education, New York, 1982) as a directory of IELP institutions, IIE identified 399 programs offering a minimum of 15 hours of classroom instruction per week. **Appendix 8** lists the IELP institutions surveyed. Each program was asked to report, as of the fall of 1982, the total number of foreign students enrolled, their sex, visa type, reporting status, and country of citizenship.

Results

IIE received 339 responses to the survey. A total of 314 institutions reported enrolling foreign students in intensive English language programs; of these, 10 reported offering summer programs only. Fifteen institutions reported enrolling no foreign students.

Table 10.0 summarizes the basic results of the 1982/83 survey with comparable results from the four previous surveys. The number of programs reporting a foreign-student enrollment increased by 3.0% over 1981/82 and the number of responses to the survey increased from 334 to 339, but the number of foreign students reported in IELPs decreased from 32,224 to 30,135, a 6.5% drop. **Figure 10A** illustrates this decline.

IELP programs that also reported their students in the Annual Census increased in number by 14.8% to 163 in 1982/83 (**Table 10.1**). They reported an 8.8% increase in enrollment or 1,041 more students. The number of programs that were reported only in the IELP survey

West Virginia	30	—	30
Wisconsin	336	420	756
TOTAL	12,901	17,234	30,135

decreased by 7.4% to 151 with a comparable decrease in foreign students of 15.4% to 17,234.

Table 10.2 lists the intensive English language programs reporting the largest enrollments of foreign students. The 10 largest programs had 17.4% of all IELP students; the 25 largest had 31.2%.

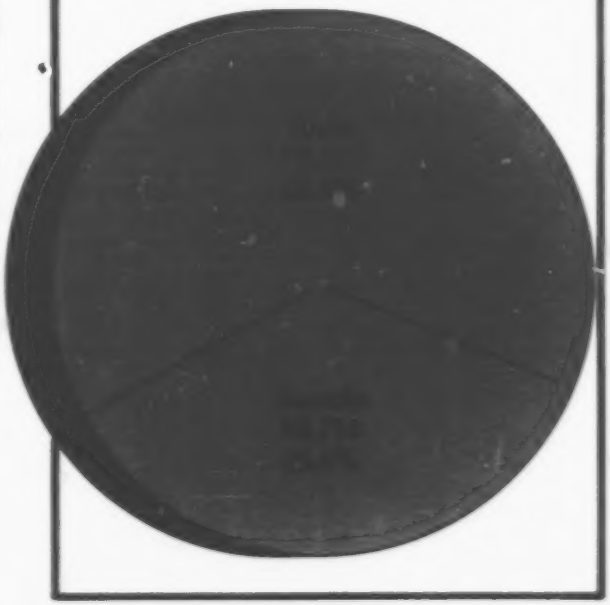
Table 10.3 lists the states reporting the highest number of IELP students. The list includes seven of the states and the District of Columbia from **Table 5.6** with the highest foreign-student enrollments, with Louisiana and Colorado replacing Michigan and Pennsylvania. Only two states, Louisiana and Illinois, reported an increase in IELP students since 1981/82, with Louisiana nearly doubling its enrollment from 951 to 1,862. Three of the eight states (Texas, Massachusetts, and Colorado) showing drops in IELP students experienced declines of more than 20%.

The 45 states (plus the District of Columbia) reporting foreign students in intensive English language programs are listed in **Table 10.4**. The number of students included in the Annual Census and those counted only in the IELP survey are listed separately.

The 10 countries of origin sending the largest number of reported IELP students in 1982/83 are listed in **Table 10.5**. They represent a substantially different distribution of nationalities than the foreign-student profile reported in the Annual Census (see **Table 2.5**). Absent from this list are such countries as Nigeria, Canada, Hong Kong, and India; noteworthy is the absence of Iran. The largest source of IELP students

FIGURE 10B

Percentage Distribution of Foreign IELP Students by Sex, 1982/83



reported in the 1978/79 survey (3,629). Iran showed a steady decline through 1981/82. In 1982/83, 439 Iranian students were reported, an increase of 149 (51.4%) over the 290 students reported in 1981/82.

There were decreases in the numbers of students from seven of the 10 leading countries, but a substantial 108.9% increase in the number of students from the Republic of Korea, from 885 in 1981/82 to 1,849 in 1982/83. The five leading countries in this table accounted for 42.0% of all IELP students reported, while the 10 leading countries represented 60.1% of all IELP students.

Table 10.6 lists the origin of IELP students by world region for 1981/82 and 1982/83 and illustrates the dominance of students from Latin America and South and East Asia. More than 70% of all IELP students reported came from these two regions.

The percentage of male and female students among IELP students is illustrated in **Figure 108**. There was a substantially higher proportion of women (35.6%) among IELP students than the proportion in the Annual Census (29.1%). The percentage of female IELP students was a slight increase from the 34.7% reported in 1981/82.

Table 10.7 shows the visa type of IELP students. Approximately the same proportion of IELP students held F visas as did all foreign students in 1982/83 (see **Table 4.6**). A lower proportion held J visas, while slightly higher proportions held other visas or were refugees.

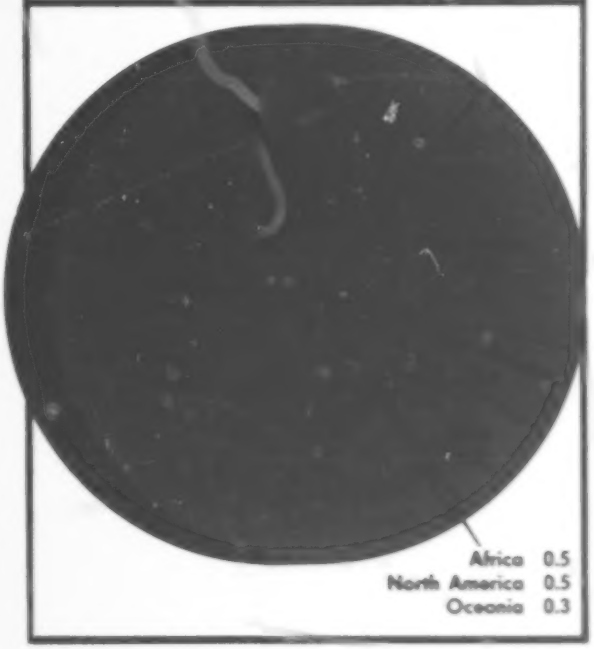
Part IV: U.S. COLLEGE-SPONSORED STUDY-ABROAD PROGRAMS

FIGURE 11A

Percentage Distribution of U.S. College-Sponsored Study-Abroad Students in World Regions, 1981/82



Background

For a number of years, *Open Doors* included data from a survey of U.S. students studying abroad, based on questionnaires sent to foreign institutions. This survey was discontinued after the 1983 edition of *Open Doors* due to declining response.

Recognizing the continued interest in the flow of U.S. students overseas, IIE is examining various methods of data collection for this diverse and difficult-to-identify group of students. As a first step, IIE identified one group of U.S. students—those enrolled for the academic year in U.S. college-sponsored study-abroad programs—and collected data supplied by those program sponsors. These have been updated on an annual basis since the first report in *Open Doors: 1978/79*.

It should be emphasized that the data in this section result from a survey of only one of many groups of U.S. students studying abroad. Other groups not surveyed include those in programs sponsored by overseas universities, those in summer study programs, and students in independent programs.

The Unesco Survey

One other source of data on U.S. students enrolled in overseas universities is Unesco, which publishes foreign-student enrollment data collected by member countries. The latest available data, published in the Unesco 1981 *Statistical Yearbook*, are from 1978.

Unesco data were first included in the 1981/82 *Open Doors*, and are reproduced here to provide the reader with additional facts on study abroad. It should be noted that the Unesco data cannot be compared directly with IIE college-sponsored study-abroad data since the two surveys measure different (though possi-

bly overlapping) populations.

The Unesco data describes U.S. citizens enrolled in universities abroad as reported by the host government. The IIE survey describes U.S. citizens enrolled in U.S. college-sponsored study-abroad programs. The latter may be fully enrolled and receiving academic credit at U.S. institutions while attending classes on the campuses of foreign universities. In some cases, the foreign universities may also report their presence to Unesco, leading to their being counted in both surveys. Since U.S. college-sponsored study-abroad programs provide a large variety of structures, ranging from efforts to facilitate student enrollment to the establishment by U.S. universities of overseas centers with some U.S. faculty, there is no way to accurately determine the overlap between Unesco and IIE data. In addition, neither survey is comprehensive—leaving some significant gaps in the information provided. Further caution is required since Unesco data are from 1978.

A summary of U.S. student data from Unesco is provided in **Tables 11.0** and **11.1**. These tables are compiled from reports from 38 countries. In addition to those countries listed in **Table 11.1**, four countries reported having no U.S. students (the U.S.S.R., Bulgaria, Algeria, and Singapore); two others (the German Democratic Republic and Turkey) respectively reported 319 and 695 students from North America (which Unesco defines as including Central America and the Caribbean with the United States and Canada). Unesco cautions that these data are to be considered "indicative, but include 90% of the known total." Data for two countries with large numbers of foreign students are not included: Brazil and Lebanon. Also absent are data from any Latin American countries other than Cuba and Guatemala, which most likely eliminates a substantial number of U.S. students enrolled abroad.

Unesco data in **Table 11.0** and **11.1** show that approximately two-thirds of all reported U.S. students enrolled in foreign universities were located in 18 European countries (nearly one-half of all countries reporting). Of the 15 countries reporting the most U.S. students, all but three (Canada, the Philippines, and Japan) are in Europe. The second-largest region reporting U.S. students was Asia (16.7%) with more than 3,000 students in the Philippines and 831 in Japan. As already noted, regional and country rankings may be skewed by the lack of data from Latin America.

The Survey

As part of the preparation of the yearly publication *U.S. College-Sponsored Programs Abroad: Academic Year*, IIE asks each program sponsor to provide the number of students who participated in the previous year, as well as information on the nationality, field of study, and the male/female ratio of foreign students.

*** Programs have additional sponsors.*
U = Unspecified fields of study

For *Open Doors*, IIE compiles these data to provide the reader with two sets of information: (1) tables describing the geographical distribution of the students reported (by world regions and countries), and (2) tables describing the field-of-study offerings.

The data collected, giving the number of students in a program (which usually includes several fields of study), do not permit the correlation of numbers of students and fields of study.

Geographical Distribution of Study-Abroad Students

In 1981/82, U.S. college-sponsored study-abroad programs reported 30,552 students, a 0.2% decrease from the number reported in 1980/81. **Table 11.2** lists the number of students in programs in each major world region as well as students in worldwide programs. It also provides each region's percentage of all study-abroad students and the number of countries within each region. **Table 11.2** and **Figure 11A** show that 69.4% (21,212) of all U.S. college-sponsored study-abroad students were located in Europe. An additional 17.2% (5,268) were enrolled in worldwide programs which sent students to more than one region but were likely to have sent a large percentage to Europe. Less than 14% of all students reported were located in the remaining world regions, with 6.8% in Asia, 5.3% in Latin America, 0.5% each in Africa and North America, and 0.3% in Oceania. These students were studying in a total of 56 countries.

The regional distribution of U.S. students in study-abroad programs is shown for the five-year period 1977/78-1981/82 in **Table 11.3**. In three regions the number of students reported in 1981/82 increased over the previous year: North America (358.1%), Oceania (48.1%), and Asia (18.9%). The number of students in Europe, Latin America, and Africa declined (-0.8%, -13.9%, and -3.0%, respectively), as did the number of students reported in worldwide programs (-1.8%).

Table 11.4 lists the number of programs and percentages of all programs for each world region. Of the 879 programs reported, 622 or 70.7% sent students to Europe. The second largest region in number of programs was Asia, with 102 programs or 11.6% of all programs. There were 64 programs in Latin America, 26 in Africa, and 49 programs in the worldwide category.

The five countries in each world region with the largest numbers of students reported in 1981/82 are listed in **Table 11.5**, with the number of students and percentage change from 1980/81 to 1981/82.

Two countries in Asia had the greatest reported percentage increases: China (85.9%) and India (50.0%). Next was the British Virgin Islands (35.1%) in Latin America. Those countries reporting the greatest declines were Canada (-71.0%); Kenya (-40.0%) and Liberia (-50.0%) in Africa; and Mexico (-42.6%), Costa Rica (-49.0%), and Colombia (-31.5%) in Latin America.

Table 11.6 shows the 20 countries with the largest reported number of U.S. study-abroad students and the number of college-sponsored programs in each country in 1981/82. Thirteen of these countries are in Europe, further illustrating the preference of U.S. students for study in Europe.

The percentage of male and female study-abroad students in each world region and for the five largest countries within each region is provided in **Table 11.7**. This table and **Figure 11B** show that the U.S. college-sponsored study-abroad programs enroll substantially larger proportions of female than male students: 61.5% to 38.5%. However, these proportions varied among regions, with Asia reporting more male students (50.4%). This was due in part to the dominance of Israel, with 53.0% men and more than four times as many students (**Table 11.6**) as the next-largest country in that region.

Several countries had substantially larger-than-average proportions of female students: all students reported in Liberia were female; Sierra Leone had 78.6% women, and Spain 71.0%. Countries reporting more men than women were Israel, Panama, the British Virgin Islands, and Australia.

Table 11.8 lists the 18 study-abroad programs that reported enrolling 250 or more students. The five largest programs enrolled 13.0% of all students; the 18 programs listed in **Table 11.8**, 2.0% of the 879 programs reported, enrolled 9,133 students or 29.9% of all reported students.

Field of Study Offerings in Study-Abroad Programs

Table 11.9 summarizes the fields of study and the number of programs offered in each field in 1980/81 and 1981/82. Included are all programs that specified fields of study in addition to the language and culture of the country(ies) in which they operate. As tabulated in **Appendix 9**, the social sciences were offered by more programs (54.7%) than any other field, with arts second (37.1%). Somewhat fewer offered humanities (20.8%) and business and management (13.5%). Of programs specifying one or more fields of study, 8.6% offered education while 14.3% had offerings in sciences, mathematics/computer science, engineering, agriculture and/or health.

Table 11.9 shows changes in the fields of study in U.S. college-sponsored programs. The most significant was a drop in the number of programs in the humanities, from 346 to 183, or 47.1%. This followed and reversed an increase from 1979/80 of 39.0%. In contrast, the fields of business and management and the social sciences were offered by substantially more programs.

Table 11.10 lists the distribution of programs among world regions for each field of study. Europe again reigns as the favored region for U.S. students studying abroad; **Table 11.10** shows that the greater proportion of programs in all fields were offered in Europe. However, when viewed in relation to **Table 11.4**, it is apparent that the geographical distribution of programs does not always follow the collective pattern. In particular, the proportion of programs offering agriculture was lower than the average in Europe and higher in Asia. There were relatively higher proportions of programs offering arts and mathematics/computer science in Europe, engineering and agriculture in Africa, and health worldwide.

Table 11.11 shows the number of programs offered in each field of study for the 20 countries with the most U.S. students reported in 1981/82. The total number of programs and the countries where they were offered are listed for each field of study in **Table 11.12**.

APPENDIX 2: Nationality of Foreign Students

Appendix 2 lists the detailed results of the survey question on the country of citizenship of nonimmigrant students. Included are five figures for each country and territory reported. They are as follows:

1. **The 1981/82 Extrapolated Count**, based upon comparable calculations reported in *Open Doors: 1981/82*.
2. **Base Numbers**, the actual count of students reported by country of citizenship on the STEP 2 form (see **Appendix 7**). This is based on STEP 2 Institutional Data reports on 291,617 students by 2,317 institutions.
3. **Percentage Distribution**, the percentage of the 291,617 students represented by the base number for each country or territory. The percentage distribution was not calculated for countries with fewer than 150 students reported.
4. **Extrapolated Count**, the World Total of 336,990 representing the actual count (336,985) of all nonimmigrant students reported in the survey for 1982/83. This number includes (1) the Base Number (291,617 students) on which detailed country data was reported plus (2) an additional 45,368 students reported by 212 institutions that did not specify country of origin.

   For countries with a Base Number of 150 or more reported students, the Base Number was multiplied by 1.1556 and rounded to the nearest 10 to determine their extrapolated share of the total student count of 336,990. These figures are used in **Part 1** of this book.
5. **Percentage Change**, the percentage change between Extrapolated Counts for 1981/82 and 1982/83. Base Numbers are used when Extrapolated Counts are not available.

APPENDIX 3: Fields of Study

Major Field-of-Study Categories

AGRICULTURE
01 Agribusiness and Agricultural Production
02 Agricultural Sciences
03 Renewable Natural Resources

ARCHITECTURE AND ENVIRONMENTAL DESIGN
04 Architecture and Environmental Design

AREA AND ETHNIC STUDIES
05 Area and Ethnic Studies

BUSINESS
06 Business and Management
07 Business and Office
08 Marketing and Distribution

COMMUNICATIONS
09 Communications
10 Communication Technologies

COMPUTER AND INFORMATION SCIENCES
11 Computer and Information Sciences

CONSUMER, PERSONAL, AND MISCELLANEOUS SERVICES
12 Consumer, Personal, and Miscellaneous Services

EDUCATION
13 Education

ENGINEERING
14 Engineering
15 Engineering and Engineering Related Technologies

FOREIGN LANGUAGES
16 Foreign Languages

HEALTH
17 Allied Health
18 Health Sciences

HOME ECONOMICS
19 Home Economics
20 Vocational Home Economics

INDUSTRIAL ARTS
21 Industrial Arts

LAW
22 Law

LETTERS
23 Letters

LIBERAL/GENERAL STUDIES
24 Liberal/General Studies

LIBRARY AND ARCHIVAL SCIENCES
25 Library and Archival Sciences

LIFE SCIENCES
26 Life Sciences

MATHEMATICS
27 Mathematics

MILITARY SCIENCES
28 Military Sciences
29 Military Technologies

MULTI/INTERDISCIPLINARY STUDIES
30 Multi/Interdisciplinary Studies

PARKS AND RECREATION
31 Parks and Recreation

PERSONAL AND SOCIAL DEVELOPMENT
32 Basic Skills
33 Citizenship/Civic Activities
34 Health-Related Activities
35 Interpersonal Skills
36 Leisure and Recreational Activities
37 Personal Awareness

PHILOSOPHY, RELIGION, AND THEOLOGY
38 Philosophy and Religion
39 Theology

PHYSICAL SCIENCES
40 Physical Sciences
41 Science Technologies

PSYCHOLOGY
42 Psychology

PUBLIC AFFAIRS AND PROTECTIVE SERVICES
43 Protective Services
44 Public Affairs

SOCIAL SCIENCES
45 Social Sciences

TRADE AND INDUSTRIAL
46 Construction Trades
47 Mechanics and Repairers
48 Precision Production
49 Transportation and Material Moving

VISUAL AND PERFORMING ARTS
50 Visual and Performing Arts

INTENSIVE ENGLISH LANGUAGE
60 Intensive English Language

UNDECLARED
90 Undeclared

Detailed Field-of-Study Categories

A classification of instructional programs produced by the National Center for Education Statistics

CODE	FIELD OF STUDY
01.0000	**AGRIBUSINESS AND AGRICULTURAL PRODUCTION**
01.0101	Agricultural business and management, general

23.0801 Literature, English
23.0901 Rhetoric
23.1001 Speech, debate, and forensics
23.1101 Technical and business writing
23.9999 Letters, other

24.0101 LIBERAL/GENERAL STUDIES

24.0199 Liberal/general studies, other

25.0000 LIBRARY AND ARCHIVAL SCIENCES

25.0101 Library and archival sciences, general
25.0201 Archival science
25.0301 Library assisting
25.0401 Library science
25.0501 Museology
25.9999 Library and archival sciences, other

26.0000 LIFE SCIENCES

26.0101 Biology, general
26.0201 Biochemistry and biophysics
26.0301 Botany, general
26.0302 Bacteriology
26.0303 Mycology
26.0304 Plant genetics
26.0305 Plant pathology
26.0306 Plant pharmacology
26.0307 Plant physiology
26.0399 Botany, other
26.0401 Cell biology
26.0402 Molecular biology
26.0499 Cell and molecular biology, other
26.0501 Microbiology
26.0601 Anatomy
26.0602 Biometrics and biostatistics
26.0603 Ecology
26.0604 Embryology
26.0605 Endocrinology
26.0606 Histology
26.0607 Marine biology
26.0608 Neurosciences
26.0609 Nutritional sciences
26.0610 Parasitology
26.0611 Radiobiology
26.0612 Toxicology
26.0699 Miscellaneous specialized areas, life sciences, other
26.0701 Zoology, general
26.0702 Entomology
26.0703 Genetics, human and animal
26.0704 Pathology, human and animal
26.0705 Pharmacology, human and animal
26.0706 Physiology, human and animal
26.0799 Zoology, other
26.9999 Life sciences, other

27.0000 MATHEMATICS

27.0101 Mathematics, general
27.0201 Actuarial sciences
27.0301 Applied mathematics
27.0401 Pure mathematics
26.0501 Statistics
26.9999 Mathematics, other

28.0000 MILITARY SCIENCES

28.0101 Aerospace science (Air Force)
28.0201 Coast Guard science
28.0301 Military science (Army)
28.0401 Naval science (Navy, Marines)
28.9999 Military sciences, other

29.0101 MILITARY TECHNOLOGIES

29.0199 Military technologies, other

30.0000 MULTI/INTERDISCIPLINARY STUDIES

30.0101 Biological and physical sciences
30.0201 Clinical pastoral care
30.0301 Engineering and other disciplines
30.0401 Humanities and social sciences
30.0501 Peace studies
30.0601 Systems science
30.0701 Women's studies
30.9999 Multi/interdisciplinary studies, other

31.0000 PARKS AND RECREATION

31.0101 Parks and recreation, general
31.0201 Outdoor recreation
31.0301 Parks and recreation management
31.0401 Water resources
31.9999 Parks and recreation, other

32.0000 BASIC SKILLS

32.0101 Basic skills, general
32.0102 Academic and intellectual skills
32.0103 Communication skills
32.0104 Computational skills
32.0105 Job-seeking/changing skills
32.0106 Motor skills
32.0199 Basic skills, other

33.0000 CITIZENSHIP/CIVIC ACTIVITIES

33.0101 Citizenship/civic activites, general
33.0102 American citizenship
33.0103 Civic appreciation
33.0104 Civic participation

34.0000 HEALTH-RELATED ACTIVITIES

34.0101 Health-related activities, general
34.0102 Birth-related health practices
34.0103 Health enhancement practices
34.0104 Health treatment/prevention practices
34.0199 Health-related activities, other

35.000 INTERPERSONAL SKILLS

34.0101 Interpersonal skills, general
35.0102 Building human relationships
35.0103 Perception of others
35.0104 Special role engineering
35.0199 Interpersonal skills, other

36.0000 LEISURE AND RECREATIONAL ACTIVITIES

35.0101 Leisure and recreational activities, general
36.0102 Crafts (leisure and recreational)
36.0103 Games
36.0104 Hobbies
36.0105 Housing/home maintenance
36.0106 Nature appreciation
36.0107 Pet care
36.0108 Sports/physical education
36.0109 Travel
36.0199 Leisure and recreational activities, other

37.0000 PERSONAL AWARENESS

37.0101 Personal awareness,general
37.0102 Coping skills
37.0103 Personal decision making
37.0104 Self-perception
37.0105 Values, attitudes, and beliefs
37.0199 Personal awareness, other

38.0000 PHILOSOPHY AND RELIGION

38.0101 Philosophy
38.0201 Religion
38.9999 Philosophy and religion, other

39.0000 THEOLOGY

39.0101 Biblical languages
39.0201 Bible studies
39.0301 Missionary studies
39.0401 Religious education

39.0501 Religious music
39.0601 Theological studies
39.9999 Theology, other

40.0000 PHYSICAL SCIENCES

40.0101 Physical sciences, general
40.0201 Astronomy
40.0301 Astrophysics
40.0401 Atmospheric sciences and meteorology
40.0501 Chemistry, general
40.0502 Analytical chemistry
40.0503 Inorganic chemistry
40.0504 Organic chemistry
40.0505 Pharmaceutical chemistry
40.0506 Physical chemistry
40.0599 Chemistry, other
40.0601 Geology
40.0602 Geochemistry
40.0603 Geophysics and seismology
40.0604 Paleontology
40.0699 Geological sciences, other
40.0701 Metallurgy
40.0702 Oceanography
40.0703 Earth science
40.0799 Miscellaneous physical sciences, other
40.0801 Physics, general
40.0802 Atomic/molecular physics
40.0803 Electron physics
40.0804 Elementary particle physics
40.0805 Fluids and plasmas
40.0806 Nuclear physics
40.0807 Optics
40.0808 Solid state physics
40.0899 Physics, other
40.0901 Planetary science
40.0999 Physical sciences, other

41.0000 SCIENCE TECHNOLOGIES

41.0101 Biological laboratory technology
41.0102 Oceanographic (biological) technology
41.0199 Biological technologies, other
41.0201 Nuclear materials handling technology
41.0202 Nuclear power plant operation technology
41.0203 Nuclear power plant radiation control technology
41.0204 Radiologic (physical) technology
41.0299 Nuclear technologies, other
41.0301 Chemical technology
41.0302 Geological technology
41.0303 Metallurgical technology
41.0304 Meteorological technology
41.0305 Oceanographic (physical) technology
41.0399 Physical science technologies, other
41.9999 Science technologies, other

42.0000 PSYCHOLOGY

42.0101 Psychology, general
42.0201 Clinical psychology
42.0301 Cognitive psychology
42.0401 Community psychology
42.0501 Comparative psychology
42.0601 Counseling psychology
42.0701 Developmental psychology
42.0801 Experimental psychology
42.0901 Industrial and organizational psychology
42.1001 Personality psychology
42.1101 Physiological psychology
42.1201 Psycholinguistics
42.1301 Psychometrics
42.1401 Psychopharmacology
42.1501 Quantitative psychology
42.1601 Social psychology
42.9999 Psychology, other

43.0000 PROTECTIVE SERVICES

43.0101 Correctional administration
43.0102 Corrections
43.0103 Criminal justice administration
43.0104 Criminal justice studies
43.0105 Criminal justice technology
43.0106 Forensic studies
43.0107 Law enforcement
43.0108 Law enforcement administration
43.0109 Security services
43.0199 Criminal justice, other
43.0201 Fire control and safety technology
43.0202 Fire protection administration
43.0203 Firefighting
43.0299 Fire protection, other
43.9999 Protective services, other

44.0000 PUBLIC AFFAIRS

44.0101 Public affairs, general
44.0201 Community services
44.0301 International public service
44.0401 Public administration
44.0501 Public policy studies
44.0601 Public sanitation
44.0602 Public transportation
44.0603 Public utilities
44.0699 Public works, other
44.0701 Social work, general
44.0702 Medical social work
44.0799 Social work, other
44.9999 Public affairs, other

45.0000 SOCIAL SCIENCES

45.0101 Social sciences, general
45.0201 Anthropology
45.0301 Archeology
45.0401 Criminology
45.0501 Demography
45.0601 Economics
45.0701 Geography
45.0801 History
45.0901 International relations
45.1001 Political science and government
45.1101 Sociology
45.1201 Urban studies
45.9999 Social sciences, other

46.0000 CONSTRUCTION TRADES

46.0101 Brickmasonry, stonemasonry, and tile setting, general
46.0102 Brick, block, and stonemasonry
46.0103 Tile setting
46.0199 Brickmasonry, stonemasonry, and tile setting, other
46.0201 Carpentry
46.0301 Electrical and power transmission installation, general
46.0302 Electrician
46.0303 Lineworker
46.0399 Electrical and power transmission installation, other
46.0401 Building maintenance
46.0402 Concrete placing and finishing
46.0403 Construction inspection
46.0404 Drywall installation
46.0405 Floor covering installation
46.0406 Glazing
46.0407 Insulation installation
46.0408 Painting and decorating
46.0409 Plastering
46.0410 Roofing
46.0411 Terrazzo installation
46.0499 Miscellaneous construction trades, other
46.0501 Plumbing, pipefitting, and steamfitting, general
46.0502 Pipefitting and steamfitting
46.0503 Plumbing
46.0599 Plumbing, pipefitting, and steamfitting, other
46.9999 Construction trades, other

47.0000 MECHANICS AND REPAIRERS

47.0101 Electrical and electronics equipment repair, general
47.0102 Business machine repair
47.0103 Communication electronics
47.0104 Computer electronics
47.0105 Industrial electronics
47.0106 Major appliance repair
47.0107 Motor repair
47.0108 Small appliance repair
47.0109 Vending and recreational machine repair
47.0199 Electrical and electronics equipment repair, other
47.0201 Heating, air conditioning, and refrigeration mechanics, general
47.0202 Cooling and refrigeration
47.0203 Heating and air conditioning
47.0299 Heating, air conditioning, and refrigeration mechanics, other
47.0301 Industrial equipment maintenance and repair, general

47.0302 Heavy equipment maintenance and repair
47.0303 Industrial machinery maintenance and repair
47.0304 Mine equipment maintenance and repair
47.0305 Oil and gas drilling equipment operation and maintenance
47.0399 Industrial equipment maintenance and repair, other
47.0401 Electromechanical, hydraulic, and pneumatic instrument repair
47.0402 Gunsmithing
47.0403 Locksmithing and safe repair
47.0404 Musical instrument repair
47.0405 Operation, maintenance, and repair of audio-visual equipment
47.0406 Shoe and boot repair
47.0407 Sporting goods equipment repair
47.0408 Watch repair
47.0499 Miscellaneous mechanics and repairers, other
47.0501 Stationary energy sources, general
47.0502 Conventional electric power generation
47.0503 Industrial nuclear energy
47.0504 Pumping plants
47.0599 Stationary energy sources, other
47.0601 Vehicle and mobile equipment mechanics and repairers, general
47.0602 Aircraft mechanics
47.0603 Automotive body repairs
47.0604 Automotive mechanics
47.0605 Diesel engine mechanics
47.0606 Small engine repair
47.0699 Vehicle and mobile equipment mechanics and repairers, other
47.9999 Mechanics and repairers, other

48.0000 PRECISION PRODUCTION

48.0101 Drafting, general
48.0102 Architectural drafting
48.0103 Civil/structural drafting
48.0104 Electrical/electronics drafting
48.0105 Mechanical drafting
48.0199 Drafting, other
48.0201 Graphic and printing communications, general
48.0202 Bookbinding
48.0203 Commercial art
48.0204 Commercial photography
48.0205 Composition, make-up, and typesetting
48.0206 Lithography, photography, and platemaking
48.0207 Photographic laboratory and darkroom
48.0208 Printing press operations
48.0209 Silk screen making and printing
48.0299 Graphic and printing communications, other
48.0301 Leathermaking and upholstering, general
48.0302 Saddlemaking and repair
48.0303 Upholstering
48.0399 Leatherworking and upholstering, other
48.0401 Precision food production, general
48.0402 Meatcutting
48.0403 Slaughtering and butchering
48.0499 Precision food, production, other
48.0501 Precision metal work, general
48.0502 Foundry work
48.0503 Machine tool operation/machine shop
48.0504 Metal fabrication
48.0505 Metal patternmaking
48.0506 Sheet metal
48.0507 Tool and die making
48.0508 Welding, brazing, and soldering
48.0599 Precision metal work, other
48.0601 Industrial ceramics manufacturing
48.0602 Jewelry design, fabrication, and repair
48.0603 Optical goods work
48.0604 Plastics
48.0699 Precision work, assorted materials, other
48.0701 Woodworking, general
48.0702 Furniture making
48.0703 Millwork and cabinet making
48.0799 Woodworking, other
48.9999 Precision production, other

49.0000 TRANSPORTATION AND MATERIAL MOVING

49.0101 Air transportation, general
49.0102 Airplane piloting and navigation
49.0103 Aviation computer technology
49.0104 Aviation management
49.0105 Air traffic control
49.0106 Flight attendants
49.0199 Air transportation, other
49.0201 Vehicle and equipment operation, general
49.0202 Construction equipment operation
49.0203 Material handling
49.0204 Mining equipment operation
49.0205 Truck and bus driving
49.0299 Vehicle and equipment operation, other
49.0301 Water transportation, general
49.0302 Barge and boat operation
49.0303 Commercial fishing operation
49.0304 Deep water diving and life support systems
49.0305 Marina operations
49.0306 Marine maintenance
49.0307 Merchant Marine officers
49.0308 Sailors and deckhands
49.0399 Water transportation, other
49.9999 Transportation and material moving, other

50.0000 VISUAL AND PERFORMING ARTS

50.0101 Visual and performing arts, general
50.0201 Crafts, general
50.0202 Ceramics
50.0203 Enameling
50.0204 Fiber/textiles/weaving
50.0205 Glass
50.0206 Metal/jewelry
50.0299 Crafts, other
50.0301 Dance
50.0401 Design, general
50.0402 Graphic design
50.0403 Illustration design
50.0404 Industrial design
50.0405 Theatre design
50.0499 Design, other
50.0501 Dramatic arts
50.0601 Film arts, general
50.0602 Cinematography/film
50.0603 Film animation
50.0604 Holography
50.0605 Photography
50.0606 Video
50.0699 Film arts, other
50.0701 Film arts, general
50.0702 Art conservation
50.0703 Art history and appreciation
50.0704 Arts management
50.0705 Drawing
50.0706 Intermedia
50.0707 Kinetics
50.0708 Painting
50.0709 Sculpture
50.0799 Fine arts, other
50.0801 Graphic arts technology
50.0901 Music, general
50.0902 Music history and appreciation
50.0903 Music performance
50.0904 Music theory and composition
50.0999 Music, other
50.9999 Visual and performing arts, other

60.0101 INTENSIVE ENGLISH LANGUAGE

90.0101 UNDECLARED

APPENDIX 4:

Countries by Continent and Subregion

1000	**AFRICA**
1100	**Eastern Africa**
1115	Burundi
1120	Comoros
1105	Djibouti, Republic of
1125	Ethiopia
1130	Kenya
1135	Madagascar
1140	Malawi
1145	Mauritius
1150	Mozambique
1155	Reunion
1165	Rwanda
1170	Seychelles
1175	Somalia
1180	Tanzania
1185	Uganda
1190	Zambia
1160	Zimbabwe
1200	**Central Africa**
1210	Angola
1220	Cameroon
1230	Central African Republic
1240	Chad
1250	Congo, People's Republic of the
1260	Equatorial Guinea
1270	Gabon
1280	Sao Tome & Principe
1290	Zaire
1300	**North Africa**
1310	Algeria
1320	Canary Islands
1330	Egypt
1340	Libya
1350	Morocco
1370	Sudan
1380	Tunisia
1360	Western Sahara
1400	**Southern Africa**
1410	Botswana
1420	Lesotho
1430	Namibia
1440	South Africa
1450	Swaziland
1500	**West Africa**
1510	Benin, People's Republic of
1505	Cape Verde
1515	Gambia
1520	Ghana
1525	Guinea
1530	Guinea-Bissau
1535	Ivory Coast
1540	Liberia
1545	Mali
1550	Mauritania
1555	Niger
1560	Nigeria
1565	St. Helena
1570	Senegal
1575	Sierra Leone
1580	Togo
1585	Upper Volta

3000	**EUROPE**
3100	**Eastern Europe**
3110	Albania
3120	Bulgaria
3130	Czechoslovakia
3140	German Democratic Republic
3150	Hungary
3160	Poland
3170	Romania
3180	U.S.S.R.
3190	Yugoslavia
3200	**Western Europe**
3203	Andorra
3206	Austria
3210	Belgium
3213	Denmark
3216	Faroe Islands
3220	Finland
3223	France
3226	Germany, Federal Republic of
3233	Gibraltar
3236	Greece
3243	Iceland
3246	Ireland
3250	Italy
3253	Liechtenstein
3256	Luxembourg
3260	Malta
3263	Monaco
3266	Netherlands
3270	Norway
3273	Portugal
3276	San Marino
3280	Spain
3283	Sweden
3286	Switzerland
3290	United Kingdom
3240	Vatican City

4000	**LATIN AMERICA**
4100	**Caribbean**
4105	Bahamas
4110	Barbados
4115	Cayman Islands
4120	Cuba
4125	Dominican Republic
4130	Guadeloupe
4135	Haiti
4140	Jamaica
4150	Leeward Islands
4151	Antigua
4152	British Virgin Islands
4153	Montserrat
4154	St. Kitts, Nevis & Anguilla
4160	Martinique
4170	Netherlands Antilles
4180	Trinidad & Tobago
4185	Turks & Caicos Islands
4190	Windward Islands
4191	Dominica
4192	Grenada
4193	St. Lucia
4194	St. Vincent
4200	**Central America**
4210	Belize
4230	Costa Rica
4240	El Salvador
4250	Guatemala
4260	Honduras
4270	Mexico
4280	Nicaragua
4290	Panama
4300	**South America**
4305	Argentina
4310	Bolivia
4315	Brazil
4320	Chile
4325	Colombia
4330	Ecuador
4335	Falkland Islands
4340	French Guiana
4345	Guyana
4350	Paraguay
4355	Peru
4360	Suriname
4365	Uruguay
4370	Venezuela

2400	**MIDDLE EAST**
2405	Bahrain
2410	Cyprus
2415	Iran
2420	Iraq
2425	Israel
2430	Jordan
2435	Kuwait
2440	Lebanon
2445	Oman
2450	Qatar
2455	Saudi Arabia
2460	Syria
2465	Turkey
2470	United Arab Emirates
2485	Yemen Arab Republic
2490	Yemen, People's Democratic Republic of

5000	**NORTH AMERICA**
5110	Bermuda
5120	Canada

6000	**OCEANIA**
6100	**Australia & New Zealand**
6110	Australia
6120	New Zealand
6200	**Pacific Ocean Island Areas**
6210	Cook Islands
6215	Fiji
6220	French Polynesia
6225	Kiribati
6230	Nauru
6235	New Caledonia
6250	Niue
6255	Norfolk Island
6260	Pacific Islands, Trust Territory of the
6240	Papua New Guinea
6205	Solomon Islands
6270	Tonga
6271	Tuvalu
6245	Vanuatu
6275	Wallis & Futuna Islands
6280	Western Samoa

2000	**SOUTH AND EAST ASIA**
2100	**East Asia**
2110	China, People's Republic of
2130	Hong Kong
2140	Japan
2150	Korea, Democratic People's Republic of
2160	Korea, Republic of
2170	Macao
2180	Mongolian People's Republic
2120	Taiwan
2200	**South Central Asia**
2205	Afghanistan
2210	Bangladesh
2215	Bhutan
2220	India
2225	Maldives, Republic of
2230	Nepal
2235	Pakistan
2240	Sikkim
2245	Sri Lanka
2250	Tibet
2300	**Southeast Asia**
2305	Brunei
2310	Burma
2320	Cambodia
2315	Indonesia
2325	Laos
2330	Malaysia
2335	Philippines
2340	Portuguese Timor
2345	Singapore
2350	Thailand
2360	Vietnam

APPENDIX 5: States within U.S. Regions

Northeast
Connecticut
Maine
Massachusetts
New Hampshire
New Jersey
New York
Pennsylvania
Rhode Island
Vermont

South
Alabama
Arkansas
Delaware
District of Columbia
Florida
Georgia
Kentucky
Louisiana
Maryland
Mississippi
North Carolina
South Carolina
Tennessee
Virginia
West Virginia

Southwest
Arizona
New Mexico
Oklahoma
Texas

Midwest
Illinois
Indiana
Iowa
Kansas
Michigan
Minnesota
Missouri
Nebraska
North Dakota
Ohio
South Dakota
Wisconsin

APPENDIX 6: Data Collection

In collaboration with the Interassociational Committee on Data Collection, IIE surveyed all the two- and four-year institutions with regional accreditation listed in the *Education Directory 1981/82*.

The survey was completed in two steps. Step 1 asked for the completion of a postcard requesting the total number of foreign students enrolled at an institution. Step 2 was a form (see **Appendix 7**: Survey Materials) in which institutional data on the eight characteristics of foreign students were requested.

Table A6.0 shows the continuing high response rate of the institutions surveyed, while **Table A6.1** indicates the number of detailed responses. **Table A6.2** provides a summary of the detailed response to the survey.

TABLE A6.0

Survey Response, Selected Years, 1954/55–1982/83

Year	Institutions Surveyed	Responding Institutions with Foreign Students	Responding Institutions with No Foreign Students	Total Responding Institutions	Percentage Response
1954/55	2,855	1,629	1,013	2,642	92.5
1959/60	3,008	1,712	808	2,520	83.8
1964/65	2,556	1,859	434	2,293	89.7
1969/70	2,859	1,734	265	1,999	69.9
1974/75	3,085	1,760	148	1,908	61.8
1975/76	3,065	2,093	168	2,261	73.8
1976/77	3,016	2,294	230	2,524	83.7
1977/78	3,053	2,475	263	2,738	89.7
1978/79	3,127	2,504	248	2,752	88.0
1979/80	3,186	2,651	299	2,950	92.6
1980/81	3,205	2,734	296	3,030	94.5
1981/82	2,862	2,454	239	2,693	94.1
1982/83	2,849	2,529	266	2,795	98.1

TABLE A6.1

Type of Response from Institutions Reporting Foreign Students, Selected Years, 1978/79–1982/83

Type of Response	1978/79		1979/80*		1980/81		1981/82		1982/83	
	Number	%	Number	%	Number	%	Number	%	Number	%
Total Only—STEP 1	942	37.6	506	19.1	299	10.9	414	16.9	212	8.4
Institutional Data—STEP 2	1,562	62.4	2,145	80.9	2,435	89.1	2,040	83.1	2,317	91.6
Individual Data—STEP 3	—	—	1,961	74.0	—	—	1,845	75.2	—	—
TOTAL	2,504	100.0	2,651	100.0	2,734	100.0	2,454	100.0	2,529	100.0

* All institutions supplying data for 1979/80 are included in the Institutional Data totals for that year.

TABLE A6.2

Summary of Institutional Data Responses (Step 2), 1982/83

Category	Foreign Students Reported	Percentage of 313,201 STEP 2 Responses	Percentage of All Foreign Students Reported (336,985)
Nationality	291,617	93.1	86.5
Academic Level	286,428	91.5	85.0
Field of Study	268,766	85.8	79.8
Enrollment Status	264,247	84.4	78.4

Marital Status	190,346	60.8	56.5
Primary Source of Funds	185,397	59.2	55.0
Visa Type	250,667	80.0	74.4
TOTAL REPORTED	313,201		92.9

APPENDIX 7: Survey Materials

ICDC
Interassociational Committee on Data Collection

AACRAO • IIE • NAFSA

October 1, 1982

Dear Colleague:

We are writing to request your continued cooperation in the Annual Census of Foreign Students in the United States.

As you know, the results of the Census are reported each year in Open Doors, a publication which is widely used by government, business, institutions of higher education, and educational exchange organizations for data on the international flow of students. Your contribution to this effort helps provide the basis for major policy decisions affecting foreign students in the United States and other aspects of international educational exchange. All respondents to the Census will receive a complimentary copy of Open Doors.

Our request to you this year involves two steps:

STEP 1: A preliminary reply postcard report of the total number of foreign students at your institution. Please fill out and return this postcard as soon as possible.

STEP 2: Completion of the institutional data form. Please read the detailed instructions on the enclosed form. This form includes a printout of the data provided by your institution last year. This data is for your information only and should not be modified or corrected. We would appreciate your filling out and returning the STEP 2 form by November 15, 1982.

Completed forms should be mailed to:

Statistical Research Division
Institute of International Education
809 United Nations Plaza
New York, NY 10017

Any questions regarding the survey may be addressed to Douglas Boyan at the above address or at (212) 883-8276.

AACRAO, IIE, and NAFSA are indebted to the thousands of Foreign Student Advisers, registrars, and other officials who have provided invaluable assistance in the conduct of the Annual Census in the past. We look forward to your continued cooperation.

Sincerely,

Ken Bogard

Kenneth Bogard
President
American Association of Collegiate Registrars and Admissions Officers

Wallace Edgerton

ANNUAL CENSUS OF FOREIGN STUDENTS 1982/83

Please complete and return this card as soon as possible, **even if you had no foreign non-immigrant students.**

Title/Office

Reporting Official

Institution

City State Zip

Reporting Official Telephone: (____) _____

The attached label should include the Title/Office, Reporting Official, and the institution's name and address. Please make any necessary changes.

1. Were there any foreign students (non-immigrants) enrolled at your institution for the 1982/83 fall term?

☐ Yes ☐ No

2. If "YES," fill in total number: ☐

3. This number is:

☐ Actual
☐ Estimated

STEP 2 INSTITUTIONAL DATA

ICDC AACRAO - IIE - NAFSA Intereducational Committee on Data Collection

ANNUAL CENSUS OF FOREIGN STUDENTS 1982/83

DEFINITIONS

A. TOTAL FOREIGN STUDENTS — a foreign student is anyone enrolled for courses in the United States who is **not** a citizen or an immigrant (permanent resident). Refugees **are** included. Do **not** include resident aliens (holding "green cards" — I-151).

B. SEX — number of male/female foreign students enrolled at your institution.

C. MARITAL STATUS — a count of foreign students at your institution who are **not** married/married.

D. VISA TYPE/REFUGEE — the count of foreign students with **temporary visas** enrolled at your institution by the type of visa they hold, and the count of **refugees** enrolled at your institution.

E. PRIMARY SOURCE OF FUNDS — the single greatest source of funds for all educational expenses including associated living expenses for a foreign student enrolled in an educational institution within the United States. If a person had more than one source of funds then **use the source** which represents the largest percentage of all income.

(1) Personal and Family — income derived from personal or private sources.
(2) College/University — funds obtained from a U.S. college or university (grants, scholarships, waivers, etc.). This does **not** include employment at the institution.
(3) Home Government — funds obtained from the government of the student's home country.
(4) U.S. Government — funds obtained from the United States government.
(5) Private Sponsorship Within the U.S. — self-explanatory.
(6) Private Sponsorship Foreign — self-explanatory.
(7) Employment — self-explanatory.
(8) Other — primary source not among those listed.

F. ENROLLMENT STATUS — the total number of foreign students who are attending classes **full time/part time.** Use your institution's definition of full time.

G. ACADEMIC LEVEL — a count of the foreign students by degree level or type of program who are currently enrolled this **fall** term. Include under Intensive English Language only students enrolled in 15 or more contact hours per week.

H. FIELD OF STUDY — please use categories in Section H of this form, which are derived from the NCES (National Center for Education Statistics) Classification of Instructional Programs. This classification system has been developed for institutional reports for federal agencies and is being implemented in federal surveys. If you are unsure of a category, use the space provided on page 4 for additional fields. A detailed listing of this new classification system appears in **Open Doors: 1981/82.**

I. COUNTRY OF CITIZENSHIP — if you have students from countries not included on this form, please use the space provided on page 4.

GUIDELINES FOR THE RELEASE OF CENSUS DATA

Reports based on census data are available to individuals, agencies or corporations for clearly identified purposes of scholarly research, public information or recruitment for employment.

Reports will be produced for recruitment purposes only when the employer has indicated that the openings are for employment in the students' home countries or, in some instances, home regions. Students' obligations to the sponsors of their U.S. study and/or to their own governments will be respected; the corporation or agency does not engage in discriminatory practices.

Students' names obtained as a by-product of the census activity will not be released in any case without the student's prior consent.

The Institute of International Education reserves the right to request that the proposed use of the data can be documented and to withhold census data when the request is not deemed to be for appropriate scholarly, public information or recruitment purposes.

1982/83 DATA COLLECTION STEP 2 INSTRUCTIONS

- INCLUDE ONLY NON-IMMIGRANT FOREIGN STUDENTS AT THE POSTSECONDARY LEVEL
- ALL INFORMATION SHOULD BE BASED ON THE **FALL TERM, 1982**
- DEADLINE FOR THE RETURN OF THIS FORM NOVEMBER 15, 1982

STEP 2 asks institutions to provide aggregate data describing the characteristics of their foreign student population for the fall term, 1982. This information is used to develop the statistics used in **Open Doors,** a complimentary copy of which is sent to the census contact at each participating institution.

The validity of the data in **Open Doors** depends on the amount of detailed data which you provide on this form to supplement the total foreign student count you provide on the STEP 1 postcard. While we encourage you to provide detail on **all** characteristics, if you cannot do so, **any** data, e.g. country of citizenship, field of study, academic level, etc., will add to the validity of the data on foreign students and will enhance the value of the final report in **Open Doors.**

This year's STEP 2 form includes the data in our files about your institution in two categories: (1) **Basic Institutional Data** and (2) data from the 1981/82 Census of Foreign Students which was used in the 1981/82 **Open Doors.** The **Basic Institutional Data** (1) should be carefully reviewed and any corrections made on the form. 1981/82 Census data (2) is included **for your reference only. DO NOT ADD OR CORRECT 1981/82 DATA.** Any major differences between the two census years should, of course, be a warning that the 1982/83 figures be verified. Please make sure that the definitions you are using match the definitions on this page in cases where the data appears to have changed significantly between census years.

Page 2 of this form is for reporting Basic Institutional Data and the Personal and Academic Characteristics of foreign students. Page 3 is for reporting foreign student countries of citizenship. Page 4 provides space for the inclusion of fields of study and countries of citizenship which are not among those on pages 2 & 3.

If the data requested will only be available after the deadline date of November 15, 1982, contact IIE so that special arrangements can be made to include it in the census. Any questions should be directed to:

Douglas R. Boyan, Manager, Statistical Research, IIE, (212) 883-8276.

THIS FORM SHOULD BE RETURNED BY NOVEMBER 15, 1982 TO:

STATISTICAL RESEARCH DIVISION
INSTITUTE OF INTERNATIONAL EDUCATION
809 United Nations Plaza
New York, N.Y. 10017

[1] Weighted Averages (by population) for 'students per million population,' 'GNP per capita,' 'Educational Expenditure per capita,' and 'Literacy Rate.' In computing the weighted average for 'Literacy Rate,' we have assumed the proportion of the population 15 years of age and older is the same for all countries.

APPENDIX 12:

Definitions and Sources of Data for Chapters 1 and 2 and Appendices 10 and 11

Countries for which data were not available for a particular category have been excluded from corresponding tables. For example, **Table 2.15**, which groups countries according to their adult literacy rate, includes only the 172 countries and territories for which literacy data are available. The percentage of all students and percentage-of-world-population numbers have therefore been calculated from the totals for these 172 countries.

Comparisons over time in tables on income groups are based on each country's income classification in 1980 and should not be interpreted as comparisons based on the changing relative levels of wealth. We are not specifically comparing the Low-Income countries of 1954/55 with the Low-Income countries of 1981/82. Note that many countries of Low-Income status at one time are now considered Middle-Income nations.

World Foreign-Student Data
Source: Unesco, *Statistical Yearbook*, 1981, Tables 3.15 and 3.16

These data, used in Chapters 1 and 2, are collected by Unesco from reports from member governments. **Appendix 11**, which lists the number of foreign students enrolled, reports on 120 countries, while **Appendix 10**, the number of foreign students by country of origin, includes 45 selected countries.

Income Classification System
Source: World Bank, *World Development Report*, 1982
World Bank, *1981 World Bank Atlas*, 1982

High-Income Group: Per capita Gross National Product (GNP) in 1980 greater than or equal to U.S. $4,880.

Middle-Income Group: 1980 per capita GNP greater than or equal to U.S. $420 but not exceeding U.S. $4,870.

Low-Income Group: 1980 per capita GNP below U.S. $420.

Organization of Petroleum Exporting Countries (OPEC): Algeria, Ecuador, Gabon, Indonesia, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, United Arab Emirates, Venezuela. These countries have not been classified as High- or Middle-Income countries.

Non-Market European: Albania, Bulgaria, Czechoslovakia, German Democratic Republic, Hungary, Poland, Romania, Union of Soviet Socialist Republics, Yugoslavia.

Countries and territories not classified that did report foreign students in 1982/83:
Africa: St. Helena (5)
Europe: Andorra (2), Liechtenstein (2), Monaco (2), San Marino (3), Vatican City (1)
Latin America: Cayman Islands (24), Falkland Islands (1), Leeward Islands (2), Turks and Caicos Islands (7)
Oceania: Kiribati (2), Nauru (1)
South and East Asia: Sikkim (3), Tibet (1)

Figures in parentheses refer to the number of foreign students reported in 1981/82.

GNP 1980
Sources: World Bank, *World Development Report*, 1982
World Bank, *1981 World Bank Atlas*, 1982

Unless otherwise indicated, the GNP figures used in Chapter 2 and Appendix 10 are per capita figures from the two World Bank publications listed above.

Literacy 1977
Sources: World Bank, *World Development Report*, 1982
Unesco, *Statistical Yearbook*, 1981

The adult literacy rate is the percentage of people aged 15 and over who can read and write. These rates are based primarily on information from the U.N. Educational, Scientific, and Cultural Organization (Unesco), supplemented by World Bank data.

Growth Rate of Real per Capita GNP, 1970–79
Source: World Bank, *1981 World Bank Atlas*, 1982

"Growth rates are average annual growth rates that have been computed by fitting trend lines to the logarithmic values of the...GNP per capita at constant market prices for each year of the time period." (*World Bank Atlas*, p.23)

Population 1980
Source: World Bank, *World Development Report*, 1982
World Bank, *1981 World Bank Atlas*, 1982

All population figures are mid-1980 estimates expressed in millions. The population figures for countries and territories with less than 50,000 inhabitants have been rounded up to 100,000. All other figures are rounded to the nearest 100,000. World population figures exclude U.S. population (227.7 million in 1980).

Educational Expenditures per Capita, 1978
Source: Roger D. Hansen, ed., *U.S. Foreign Policy and the Third World: Agenda 1982*

Figures represent total public current and capital expenditure on education per capita in 1978 and are expressed in U.S. dollars.
